

— PROCESS INTELLIGENCE PLATFORM

Build your company knowledge.

Yone maps how your business really works — its processes, roles and systems — and keeps that knowledge live, shared and actionable.

— THE PLATFORM

One place. Connect all your company knowledge.

Journey Processes Organisation Systems Data Capabilities Knowledge *in your own business context — industry, regulatory background*

Capture
Map processes from L0 strategy to L2 activity. BPMN-ready, editable, owned by operations.

Structure
Business rules, data flows, system dependencies — attached to every step. Versioned. AI-enriched.

Share
New hire, auditor, AI agent — everyone navigates the same live model. Not a PDF.

— SO YOU CAN

Transform how you operate.

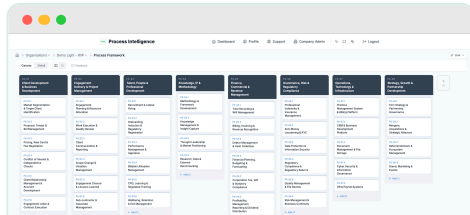

CLARITY
Every team works from the same picture.
Processes, roles and systems in one live place. New hires ramp faster. Decisions made on how the business actually runs.

COMPLIANCE
Documentation as a byproduct, not a scramble.
Processes linked to what regulations require. Audit evidence already there — ISO, SOC2, sector frameworks.

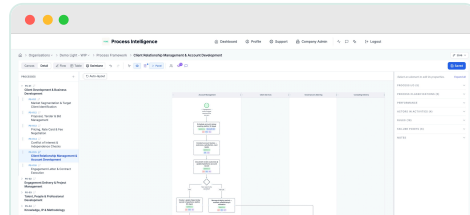

TECHNOLOGY & AI
Know what to automate before you automate it.
Real business rules and data flows surfaced before you commit to a scope, a vendor or a budget.

IMPROVEMENT
A baseline you can measure against.
Version management shows what changed, when and what it solved. Improvement becomes a documented practice.

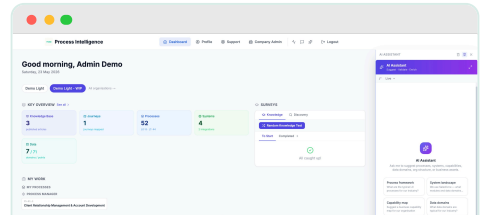

— FEATURES

Process Framework Canvas
L0–L2 hierarchy — every domain, process and sub-process connected and navigable.

BPMN Diagram Editor
Swimlane diagrams with systems, rules and data attached at each activity step.

Platform Dashboard
One view across your knowledge — processes, systems, data and AI in context.

— HOW TO GET STARTED

Platform — priced by what you need, not by seat.

Scale by the number of processes you map. Full feature access and AI budget included at every tier — no feature gating.

Startup
Up to 20 processes **ALL OBJECTS**
Journey · Processes · Organisation · Systems · Data · Capabilities

Growth
Up to 50 processes · SSO · Surveys · Version & project management **ALL OBJECTS**

Enterprise
Unlimited · multi-org · custom SLA **TAILORED**

Consulting — we help you build your first model.

We run the interviews, structure the framework and hand over a live platform in weeks — not months.

- 01 **Week 1 Scope**
Align on objectives, domains and what "done" looks like.
- 02 **Weeks 1–3 Discover & Document**
Structured interviews. Processes, rules and systems captured live on the platform.
- 03 **Weeks 5–6 Handover**
Team onboarded, ownership assigned, governance in place.

Ready to build your **operating model?**
In your own **business context.**
