

Batching and Milling Course 2026

We are proud to announce that Promtek will be hosting its first educational course. The Batching and Milling course will be apart of our ongoing commitment to high-quality technical training and skills development. The course will be presented by Ernst Nef, who brings valuable industry experience and practical insight into batching and milling operations.

Together we aim to provide participants with relevant knowledge and practical understanding for effective production processes.

During this course you'll get 3 full days to:

1

Gain insights from an industry expert with over 33 years of experience in milling and batching

2

Learn all about core processes, including: batching, size reduction, mixing and liquid addition.

3

Get inspired and implement new knowledge into your own process.

Why attend?

Ernst's teaching style embodies wisdom, authority and knowledge, enabling you to implement best practices and improve efficiency in your own factories.

Attendees will receive guided instruction on mixing systems, size reduction, blending, and liquid addition, learning step-by-step how to optimise each stage of their production process.

The course wraps up with a practical test, helping participants validate their learning and prepare to optimise their own milling and batching processes.

Its also a great opportunity to connect with industry peers and build ongoing, valuable relationships.

Who should attend?

- Plant and Production Managers
- Shift and Maintenance Leaders
- Anyone looking to enhance their understanding of the batching and milling process

WHEN? September 15th - 17th

9:00 AM - 5:00 PM

WHERE? Promtek

Fisher Street, Brindley Ford

Stoke-on-Trent, ST8 7QJ

Ernst Nef

Ernst brings extensive expertise from his tenure at SFT and Bühler Group, with over three decades of hands-on experience. Specialising in mill efficiency, process optimisation, and quality control, he has designed a course that is both innovative and technically rigorous.

Enjoy a hassle-free experience with our **exclusive hotel deal**, which **includes accommodation** as well as **meal allowance**.

Or simply enjoy the full course experience, **without accommodation**.
