Digital Transformation Services

Consultancy

Understanding your challenges and building a vision and plan for digital transformation.

Process transformation

Digitising existing manual & paper based processes and procedures to improve efficiency and operations.

Product and service transformation

Developing new digital services and experiences for customers that improve satisfaction and loyalty creating additional revenue streams.

Upgrading legacy systems

A phased modular approach to refactor or re-platform.

Migrating to the cloud or a hybrid environment

Improving compliance, security and performance.

Sustainability

Identifying & implementing solutions to help with the transition to Net Zero.

Cyber security

Ensuring software is engineered with security baked in throughout development lifecycle.

Manufacturing 4.0 & Internet of Things

Track Record

Stanley Black & Decker

World's largest tool company

- Designed and delivered a new digital Bill of Materials system and Global Service Information System as part of a business process transformation project. A single system aligning the US, EMEA & Asia business functions using common data standards and processes and integrating with third party solutions.

McAlpine

The UK's leading producer & exporter of plumbing products

- Programme of work to help update the core ERP system and other key processes to benefit from new digital technologies. Improvements delivered to a wide range of operational areas including product data, orders, stock & invoicing.

Rearo

Glasgow based manufacturer of laminates

- Consultancy, development and support services to help migrate an existing ERP system from an old unsupported version of Microsoft .NET (VB6) to C# whilst also making improvements to the User Interface and allowing integration with other systems e.g. e-commerce platform.

Sealey

Professional tools & workshop equipment specialists

- New digital solution to help Sealey export their goods to Northern Ireland more efficiently following Brexit. We developed an interface to the UK Government's Trader Support Service to help save the full-time work of four people.

Centrica

International energy services business

- System that holds all of Centrica's appliance service information including parts lists/numbers, technical documentation, diagrams and images to enable over 7,000 field engineers to access data from customer's homes.
