

WHY CHOOSE AGAD? 10 KEY ADVANTAGES

01

Seamless Industrial Integration: AGAD connects every part of your operation—from edge devices to the cloud or on-premise — ensuring a unified, real-time view of your industrial data.

02

Independent & Future-Proof: Unlike many platforms, AGAD doesn't rely on third-party infrastructure like AWS, Google, or Azure. It's a fully self-contained IIoT/UNS solution, built for long-term reliability.

03

Engineered for Industry, Not Repurposed: Designed from the ground up by experienced Operational Technology engineers, AGAD is not a repackaged IT product—it's purpose-built for industrial environments.

04

User-Centric, No Hidden Costs: with built-in multi-tenant access, role-based controls, and no per-user fees, AGAD ensures secure, scalable collaboration without unnecessary costs.

05

Proven, Industry-Driven Framework: AGAD's modular COGS (Centralised Operational Gateway System) structure is shaped by real-world industrial use cases—adapting to your specific operational needs.

06

Agile, Responsive and Built for You: our team works closely with users, refining AGAD based on real operational challenges. We don't just sell software — we deliver solutions that evolve with you.

07

Digital Twin, Made Simple: Easily replicate and monitor your physical assets in the cloud, creating a real-time digital twin for better decision-making and predictive maintenance.

08

Scalability Without Complexity: whether you manage a few data points or thousands, AGAD scales effortlessly, helping you expand without the burden of technical debt.

09

Break Down Data Silos: AGAD seamlessly connects to other platforms, providing a single-pane-of-glass view of your entire operation — empowering smarter, faster decision-making.

10

Rapid Deployment, Immediate Impact: Designed for easy installation by onsite engineers or system integrators, AGAD gets you up and running quickly, minimising downtime and maximising efficiency.
