

Our long life dual UWB/BLE Asset Beacon has been designed to provide you with high accuracy asset location and condition intelligence in your facility.

When your asset is tagged, an anonymous identifier is broadcast along with live telemetry including temperature, humidity and motion data.

The UWB Asset Beacon is compatible with our indoor and outdoor Detectors and can also be identified by Pathfindr's stand-alone GPS+ Tracker.

- BLE (2.4GHz – 2.5GHz)
- UWB (6.5GHz)
- LiSOC2 2200mAh
- Broadcast range up to 30m
- Small form factor (62x38x15mm)
- IP67 enclosure as standard
- ROHS compliant
- All components CE certified

Features

- Up to 3 years battery life
- Up to 1m location accuracy
- Secure, no identifiable data
- Temperature/Humidity sensor
- Pressure sensor for height detection
- Audible alarm
- 3 axis motion sensing
- FOD aware design
- Rugged form factor
- Intelligent broadcast frequency
- Coolant and oil resistant
- Multiple fixing options
- Silicone free
- 10 years shelf life
- User replaceable battery
