Data Automation

MADE IN
BRITAIN

Improved manufacturing operations efficiency through real-time accurate information prevents delays in customers' orders

The Proactive Information Board provides real-time insights into production line performance, enabling proactive identification and resolution of issues before they escalate, thus optimising operational efficiency.

By continuously monitoring production line data and providing proactive alerts, our solution minimises downtime by addressing potential issues in advance, resulting in increased productivity and throughput.

If you have a burning question about your project, would like to ask about our projects or you want to improve your production process, please do not hesitate to email us by scanning the code.

Funded by
UK Government

Our Proactive Information Board is valued by successful businesses to support their digitalisation journey. It has been invested in through the government's local business support services.
