DAFO

Train your team
Improve productivity
Save time

With the Digital Assistant For The Operators

What is DAFO?

A modular, flexible, and scalable solution that helps manufacturers to optimise their production processes by focusing on staff training.

Modules & Features

- Object detection
- Assembly verification
- Barcode & QR
- Locating & counting
- Defect inspection
- Classification
- OCR

Training

Guide the operator using images and synthesised voices in their language.

Guidance

Step-by-step knowledge to assemble multiple products and its variants. Speed the process and reduce costs.

Optical Inspection

You can verify the quality of the product throughout the process.

Traceability

Avoid assembly mistakes and missing parts.
