Our Vision:

Technology That Moves With the Industry

We're Not Just Another Software Vendor

TracyCore is a next-generation food production platform built from scratch to evolve with the industry. Unlike legacy providers who scale one-size-fits-all tools, we believe no two factories are the same. That's why we build with you—not just for you.

We don't sell licenses, we form partnerships.

With each client, we co-design and refine every process like tailoring a perfect-fitting suit.

Our agile platform, free from outdated tech and rigid systems, allows us to innovate fast, respond to change, and continuously improve, both internally and with you.

We sponsor a culture of continuous improvement not just in your production flow, but in our business. Every insight from our partners directly shapes our roadmap.

- **Zero legacy systems**
- **Platform designed for flexibility**
- **Client-led development process**
- **Built on modern, adaptable tech**
- **Real partnerships over software contracts**

Why Choose TracyCore?

The Right Time, The Right Partner

Your goal is leaner operations, reliable compliance, and digital efficiency. Our goal is to deliver exactly that with speed, precision, and long-term commitment.

TracyCore brings you a unified platform that replaces fragmented tools with powerful automation, full traceability, and integration with your infrastructure.

Our Story: Built by Operators, Not Just Developers

We've lived the daily chaos of food production. We know the pain of tools that don't talk to each other, and systems that force you to change how you work.

So, we built TracyCore differently:

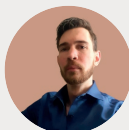

A platform that adapts to you.

Meet the Founders

CEO and Founder:
Giovanni Iovene

Over a decade in food production, leading kitchen ops and compliance for brands like Pure and Taster. Giovanni brings deep hands-on experience and operational insight.

CTO and Founder
Andras Marton

A compliance-focused veteran with deep expertise in food safety and regulatory frameworks, Andras ensures TracyCore's solutions meet the highest standards of safety and efficiency.

The TracyCore Solution at a Glance

One Platform. Total Control

Digital Factory Management & Compliance

Digital Factory Management

- Full visibility of goods and works orders from receipt to dispatch
- Tablet and scanner interfaces
- Live-stock movement tracking
- Financial analytics and cost insights

Traceability & Compliance

- Batch-level tracking with audit-ready logs for BRC and customer requirements
- CCP monitoring

Label & Code Control

- Print job deployment
- Autocoding features
- Line validation and live feedback

The TracyCore Solution at a Glance

One Platform. Total Control

Stock Control & Integrations

Stock Control & Inventory

- Real-time visibility by location
- Label generation with QR codes
- Hold/release workflow management

Weigh-Up & Scale Integration

- Target/tolerance indicators
- Final weights linked to batches
- Time-stamped weighing data

Seamless Integrations

- Accounting for sales and purchase
- EDI for orders
- Printers, scales, barcode scanners

Hardware Integration: Seamless Printer Integration with TracyCore

TracyCore connects directly with leading printer systems, giving you full control of labeling and line printing without extra manual setup.

No switching between devices — everything is managed from one platform.

Illumex Thermal Inkjet (TIJ) Printers

- High-resolution printing for batch codes, expiry dates, and product labels.
- Direct integration with TracyCore ensures automatic data flow from your production system to the printer.
- Eliminate manual errors with centralised control of print templates.
- Perfect for fast-paced environments where precision is essential.

Hardware Integration: Seamless Printer Integration with TracyCore

TSC Printers

- **Reliable label printing for inventory, packaging, and logistics.**
- **Seamless TracyCore integration means labels are generated instantly from live production data.**
- **Supports a wide range of media and formats for flexibility.**
- **Scalable for growing businesses with higher print volumes.**

The TracyCore Advantage

- **One dashboard to manage production and printing.**
- **Reduced downtime with fewer manual setups.**
- **Accurate, consistent, and compliant labeling every time.**
- **Built for food industry needs — not just generic printing.**

Ongoing Support & Easy Access

More Than Software: A True Partnership

Here's what you can expect after go-live:

- Dedicated Support Lead — Your single point of contact for onboarding, troubleshooting, and growth.
- Annual On-Site Optimisation Review — We come to you, review performance, and identify areas to refine.
- Regular Product Enhancements — You get all updates and improvements, no extra fees.
- Custom Feature Development — Need something unique? We build around your operations, not the other way around.

We grow with your business and adapt to every new challenge you face.

Unlimited Access. Zero User Fees.

TracyCore is built to scale with your team, not charge you for it.

- Up to 100 Users Per Facility
- Access via Phones, Tablets, Laptops & Scanners
- Role-Based Permissions — Control who sees and does what
- No Per-User Charges — One flat monthly fee
- Anywhere Access — From weigh-up to dispatch, your team stays connected
