FANUC

polestar 
Industrial IT

IoT Edge, in a Box!

Secure all your machinery and field device data **in one place**. You can target improvements in productivity and efficiency with these apps, available at FANUC's open platform.

Uptime Enhancement

FANUC ZDT Viewer
NSK | Condition Monitoring | ACOUS NAVI
FANUC CNC and Robot Backup
THK | OMNI Edge for FIELD System
FANUC Daily Check
IGUS | Smart Plastics i.Cee
SMC | Wireless IO OPC-UA
ALASCOM APM
FANUC CNC Edit Log

Productivity Improvement

FANUC MT-LINKi
FANUC PMA-Monitor
COGNIVIX | Fieldview

OEE

OPENDATA
OPERA SMART OEE

Quality Boost

DAIM | Process Stability Calculation
MARPOSS | ARTIS C-ANALYSE
MITUTOYO | Instruments Measuring
RENISHAW | Renishaw Central

Explore our Demo Packages

Connect any production machine or device, regardless of brand or generation.

Easy IoT (Pilot)

Basic package, up to 7 devices.
Price of Pilot: £9,995*

Smart OEE

Max OEE package.
£305 per machine.

C-Analyse

Machining process
and tools monitoring.
£295 per machine.

(Optional)

Easy IoT (After-Pilot)

Basic package, up to 7 devices.
Includes hardware.
Annual subscription.

Hardware/Software Uplift:
£6,995*

Smart OEE

Max OEE package.
£305 per machine.
Annual subscription.

C-Analyse

Machining process
and tools monitoring.
£295 per machine.
Annual subscription.
Hardware: £6,235
(one off).

(Optional)

*FIELD system estimated pricing, the exact value depends on the conditions at the customer's premises.

Industrial IT 

Industrial IT Services for the FIELD System

Our **Industrial Networking Solutions** can help you to securely and efficiently connect entire production lines to the FIELD System, stream data in real-time, and collaborate in improving plant performance.

Consulting & Design

Discover which are your data, infrastructure and security needs for the **implementation** of the FIELD system within your factory.

Installation

Depending on your circumstances, we may need to **install** cabling and other networking systems if required. We can assist you.

Support

We will assist you through FANUC's FIELD System Support Services and offer you **direct support** on additional components.

FIELD system allows users to connect any production machine or device, regardless of brand or generation – in a single, unified and powerful system. It grants manufacturers **secure Edge access** to their production data, and Cloud access to diverse third-party Apps, tailored to every management need.
