Delivering 360 Video Live Stream Solutions
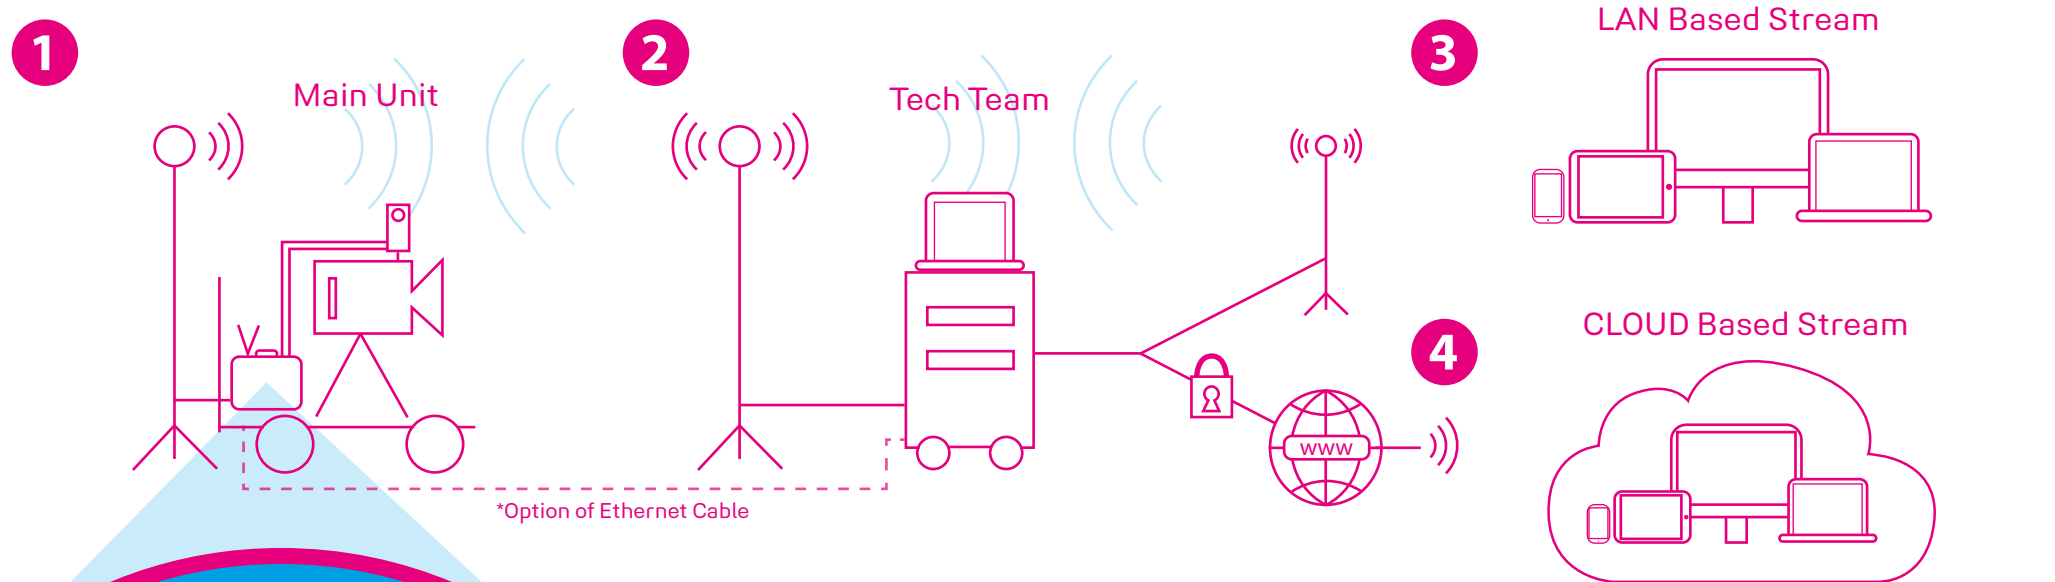

Remote | Capture | Streams | Immersive

Instantly transporting you to any location... Virtually

+   Immerse youself in any environment remotely.

+   Collaborate from geographically different locations.

+   Reduces the number of crew on set (Covid-19).

+   Self sufficient system that requires no additional hardware.

+   On set referencing assisting in continuity and art direction.

+   Witness camera facilitating Covid-19 Track and Trace.

+   Minimal latency allows for real-time collaboration.

M7 provides a state of the art customised network system, guaranteeing the best signal strength for all connected devices enabling crews to continue filming whilst being in geographically separated locations. Our Live 360 Video Streaming system can be integrated into any Local Area Network (LAN) or Wide Area Network (WAN) – without the need for network or power cables.

The M7Virtual remote viewing systems...

Switch

Router

1. A 360 camera can be mounted to the film productions Main Unit camera or can be placed on a stand in close proximity to the Main Unit camera. The 360 camera is powered and streamed via a portable case containing batteries, associated networking and mobile data solutions.

2. The 360 stream can then be sent to the Tech Team computer via WiFi or Ethernet cable.

3. The Tech Team then distribute the 360 stream. The 360 stream can be viewed securely over an intranet/local network. Footage is remotely available for user-controlled playback, immediately after every take.

4. The 360 stream also be sent securely via the internet to remote clients (with the correct access rights) anywhere in the world.

Be on location anywhere, anytime

M7Virtual have developed a cutting-edge turnkey solution for Live 360 Video Streaming. Utilising our years of experience in 360 immersive technologies, M7Virtual has been able to bring our expertise into some of the world's largest studio feature film productions.

Stream

Support

Streaming to the internet over mobile devices will come with additional costs (Pay as you go). If you're using an existing network it will be as per your exisiting data tarrif. You can still stream at no additional costs over a local network.

We offer support over the phone or if required we can send our technicians to your location as needed. This is standard day rate. We can also support on an 'as and when needed' day rate.

*Please get in touch to discuss day rates and bespoke costings. Data costs not included (typically between 2-3GB of data per hour of stream)
