

# THE NEW BENCHMARK FOR TECHNICAL EXCELLENCE

# ENGINEERING at Hooper Quinn

Hooper Quinn is a trusted engineering consultancy providing expertise to innovators and pioneers through a complete product and technology development ecosystem. Combining interdisciplinary engineering methods with proven in-house processes, we specialise in providing targeted support to accelerate projects towards effective solutions, empowering our clients to proceed with confidence.

PROJECT MANAGEMENT

## Advanced Technologies

Supporting projects across the TRL spectrum, our high-impact advanced technologies team leverages its experience in large-scale research and development programmes to help clients understand, solve, and test their unproven technological and scientific innovations.

- Assembled from top-tier Formula 1 teams, our heritage is deeply rooted in motorsport, and we continue to work at the cutting edge of the industry through our involvement in 2026 Formula 1 powertrain development.
- We offer a comprehensive suite of services designed to meet all mechanical, systems, and electronics & software design engineering and analysis requirements, from ideation to production.
- Our robust in-house design, testing and prototyping procedures ensure all our technological development projects follow a well-trodden path, maintained to the highest standards from start to finish.
- Current and past engagements include: test facilities design, carbon capture technology, hybrid/electric powertrains for marine applications, ammonia-to-hydrogen reforming, medical laboratory test equipment, autonomous marine drones for global meteorological and oceanographic data collection, and much more..

## How we work

- We operate as a autonomous engineering resource delivering turn-key components or whole systems to a set of requirements, or integrate seamlessly into existing programmes to meet peaks in engineering demand.
- Organisations including universities, startups, RTOs, NGOs, SMEs, and government departments approach Hooper Quinn to be their dedicated engineering partner on both private and public sector projects.
- Companies enter into strategic partnerships with us to leverage Hooper Quinn's reputation for engineering excellence when applying for grant funding and other forms of investment.
