

THE TORQUE TOOL SPECIALISTS

Power Assembly Tools

Electric Screwdrivers Robotic Screwdrivers Air Screwdrivers Pulse Tools

For tightening fasteners with precision torque control. Increase productivity and enhance process control.

DC Control Tools Cordless DC Control Tools

Smart electric screwdriver system expedites all aspects of the automation process, from installing error-proofing disciplines to adaptive fastening strategies.

Ergonomic Torque Arms Position Control Torque Arms Tool Balancers Screw Counter Screw Presenters

Essential assembly aids for power tools to enhance productivity, quality and safety.

Torque Wrenches

Cam-Over Wrenches

The error-proofing features a cam-over mechanism that prevents over-torque events. The preset wrench ensures that the correct torque value is consistently applied to each fastener.

Break-Over Wrenches

Torque limiting wrench reduces the risk of both over and under-tightening. The break-over mechanism provides a visual indicator of achieving torque setting. Offers interchangeable end fitting design—selectable head types and sizes.

Click Wrenches

Metal handle wrenches that are durable and robust for a wide variety of industrial and maintenance applications.

Wrench Heads

Compatible for various applications from open end spanner, box end, flare end, hex key, or a ratchet head wrench.

Torque Screwdrivers

Preset Screwdrivers

The poka-yoke screwdriver features a cam-over mechanism that prevents over-torque events. The preset tool is for fastening applications where operators repeatedly assemble parts at the same torque setting.

Adjustable Screwdrivers

The error-proofing screwdriver features a cam-over mechanism that prevents over-torque. An adjustable tool is for fastening applications where different setting torque value options are necessary.

Preset Torque Limiters

They are designed to be used in-line to limit torque for hand (static) applications.

Torque Analyzers and Sensors

Torque Analyzers Torque Sensors Run Down Adapters Calibration Equipment

Instruments for measuring torque, calibrating tools and torque verification.

Torque Multipliers

Hand Multipliers Pneumatic Multipliers Electric Multipliers Radial Gearing Multipliers

For tightening and loosening large bolts (high torque applications). Tools are non-impacting and operate at a smooth, continuous rotation.

Bits, Sockets and Adapters

Bits Sockets Adapters Nutsetters & Bit Holders

High-quality bits, sockets, and adapters that connect with various torque tools.

A SERVICE APPROACH THAT SUPPORTS YOUR BUSINESS

Calibration Service

Keeping your operations moving is a complex task. Time is precious, and you need repairs and calibration done quickly; that is our commitment to you. Tools leave our door within 5-7 business days of approval; we offer a rush two-day service as well.

We calibrate most brands of torque equipment listed below. If you have equipment that requires software or requires calibration above 1,000 lb/ft, please get in touch with us before sending in your equipment.

TORQUE TOOLS WE CALIBRATE

- Wrenches: Click, Dial, Beam, Cam-Over and Break-Over Wrenches
- Screwdrivers—Dial, Micrometer, Preset and Adjustable
- Analyzers/Sensors
- Electric Screwdrivers
- Air Tools: Impact Wrenches, Drills, Pulse Tools, Air Screwdrivers, Nutrunners, DC Controlled Nutrunners
- Multipliers

Mountz Torque Tool Repairs

We understand the impact when your tools need to be pulled from the production line for service. Our dedicated service coordinators ensure we offer the most cost-effective and time-efficient solution, so your tools get back online as quickly as possible. To ensure timeliness, we only repair Mountz torque tools and calibration equipment.

CERTIFICATIONS

- ISO 9001 registered
- ISO 17025 accredited
- ISO 6789:2003 compliance for all tools shipped

ABOUT MOUNTZ

Mountz, The Torque Tool Specialists®, has been a leader in the torque tool industry for more than 55 years. Engineered in the Silicon Valley and serving the globe, Mountz focuses on delivering high-quality torque products, services, and solutions to ensure customers can always proceed with confidence. We are committed to forging a safer world through precision and accuracy, and by innovating every day.
