

Bauomat UK Ltd is a leading System Integration Engineering Company, established in March 1997, specialising in the design and delivery of advanced manufacturing solutions across a variety of industrial sectors, including Aerospace, Automotive, and General Industry.

With decades of technical expertise and strong partnerships with global technology leaders, Bauomat has evolved into a specialist provider of robotic automation systems. Our comprehensive range of solutions integrates cutting-edge technologies with competitive pricing, made possible through our extensive network of partners, each bringing unique core competencies to every project.

Bauomat offers complete turnkey solutions, delivering “one-stop-shop” automation systems tailored to meet each customer’s unique production needs. Our core competencies include:

- Robotic Welding Systems (Arc & Resistance)
- Standard and Bespoke tooling fixtures
- Automated Handling & Assembly Systems
- Automated 3D vision bin picking systems
- Sealing and adhesive systems
- Laser Welding and Cutting Systems
- Integrated Safety and Control Systems
- Service, support & training

Whether you're looking for a pre-engineered standard product or a custom-engineered high-tech solution, all systems are developed with flexibility, quality, and efficiency in mind. We work closely with our clients from concept to commissioning, ensuring that each solution aligns with their goals in terms of productivity, quality improvement, and profitability.

What sets Bauomat apart is our customer-first approach. We don’t just sell automation equipment—we provide complete, sustainable solutions. By building close working relationships with our clients, we gain a deeper understanding of their operations and objectives, enabling us to design and deliver solutions that are both practical and future-proof.
