# Why Firebrand?

Your organisation needs teams that keep pace with rapid digital change and deliver with confidence

Firebrand builds capability through accelerated, vendor-approved training that fits around business priorities, minimising downtime and delivering measurable impact.

Ranked among the world's top 20 IT Training Providers for 12 consecutive years, Firebrand is the trusted partner of global enterprises, public sector organisations, and fast-growing start-ups, to develop critical skills quickly, efficiently, and at scale.

## Training for modern organisations

Whether you're onboarding new talent, closing critical skills gaps or preparing teams for major transformation, our training adapts to your goals and operational priorities.

## Choose the learning strategy that suits your organisation:

- ✓ **Online Live** – Live, interactive sessions with expert instructors from anywhere. Enjoy the flexibility of remote learning without compromising on real-time engagement and collaboration. Provides consistent, expert-led training for distributed teams.
- ✓ **Classroom** – Face-to-face training with industry experts in a dedicated learning environment. High-focus, hands-on sessions with direct access to experts.

# Your biggest challenge – Keeping pace with digital transformation

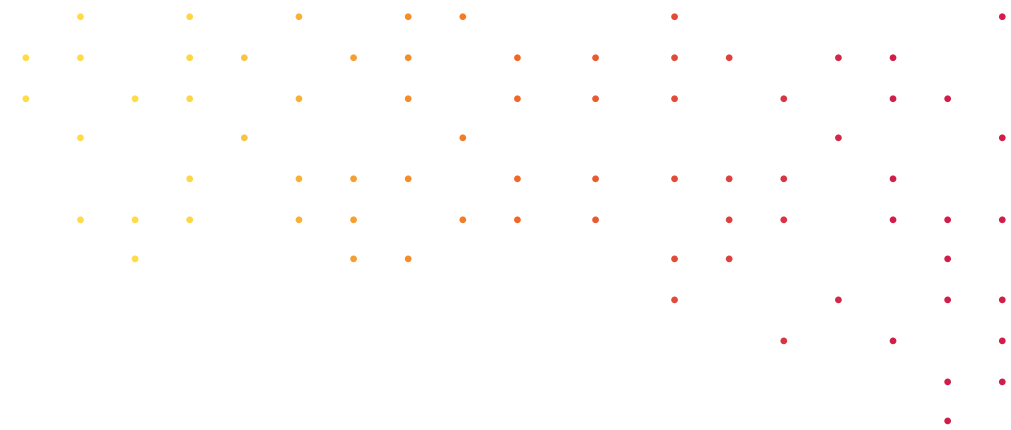

## Adapt or fall behind? Thriving in the digital age

In today's fast-paced world and competitive market, staying relevant is one of the greatest professional challenges. Businesses and professionals must remain agile, continuously adapting to emerging technologies and in-demand skills such as cyber security and AI.

At Firebrand, we make that possible. Our expert-led, future-focused courses are built to meet today's demands and anticipate tomorrow's. Updated constantly, to ensure you're never left behind.

In today's competitive market, standing out matters. Whether you're starting your career, switching paths, climbing the ladder, or upskilling your team, globally recognised certifications prove you have the industry-aligned skills and knowledge to drive success.

Leveraging our industry expertise and global connections, we set the benchmark for certification courses, practical resources, and professional networks that drive growth for individuals and businesses worldwide. We deliver training in the most in-demand skills, hands-on learning tools, and globally recognised certifications.

### What makes Firebrand different?

#### Results that speak for themselves

Your goal is success – and that's why we exist. With a 97% satisfaction score and first-time pass rates far above the industry average, Firebrand training delivers outcomes you can count on.

#### Fully inclusive learning experience

Our immersive approach is designed with everything needed for a tailored, seamless path to certification. Experience a fully supported learning journey with courses that can include learning materials, practice tests, exams or exam vouchers (if relevant).

#### Lecture. Lab. Review. Result.

Our proven accelerated model turns theory into practice. Delivered by certified IT professionals with real-world expertise, every course blends hands-on labs, immersive simulations, and structured review sessions – so your teams leave ready to perform and succeed.

#### Trusted by industry leaders

We're accredited by the world's top vendors and chosen by leading tech businesses to train their teams. Why? Because we deliver practical, job-ready skills taught by experts who know what works.

# Proven results – How we drive change

Trusted by IT and training managers at leading global companies, we design and deliver strategies that drive business success. See what they have to say about partnering with Firebrand.

We have worked with Firebrand for years, providing apprenticeships and great opportunities for those on them.

**Tom N**

Excellent trainer who used multiple methods to keep the candidates interest during what was expected to be a dry course.

**Ian**

“At Utilita, we know that people are the business’s most-valuable asset,” Phil explains. “We decided immediately to invest in the team’s skills development, and we needed to do so quickly.”

Phil liked Firebrand’s accelerated learning model. His team would be able to learn a wide range of IT skills, while only needing to be out of the office for short bursts of time. This meant he was able to schedule the training alongside his team’s projects and not affect team output.

“I’ve been on lots of traditional training courses before. Training is generally dragged-out over weeks and months, and I’d lose interest. Training can just be an expensive distraction. I liked Firebrand’s business model: the speed and quality, with a mix of both formality and informality.”

**Phil Roberts**

Head of IT, Utilita

## Our valued partners

We collaborate with the world’s leading tech vendors, exam boards, and education bodies to deliver certified, career-focused training. These examples represent just a few of our valued partners. We partner with a broad network of leading organisations to ensure every course is reliable and designed for real-world impact.

# Setting the benchmark – Industry-approved standards you can trust

Leading with integrity and backed by industry expertise, training with Firebrand is where leadership meets industry standards. At Firebrand, excellence isn't optional – it's our standard.

Our instructors bring real-world expertise, our courses are continuously updated to meet the latest industry demands, and our immersive approach delivers practical, job-ready skills fast.

We don't just teach, we build capability, so your teams perform from day one. Firebrand training equips you with skills and knowledge that reflect the latest industry trends, technologies, and best practices, empowering your personal and professional growth.

Our accelerated learning mode ensures your people are ready to apply skills immediately, with:

- Continuously updated content aligned to changing industry needs
- Real-world labs, simulations, and hands-on practice
- Globally recognised certifications that validate capability

The result is a workforce that strengthens resilience, improves productivity and accelerates change.

# Why certification matters

Firebrand certifications give your workforce the industry-aligned skills your organisation depends on. Certified employees perform with greater confidence, make better decisions, and contribute measurable value from day one, so your organisation can stay competitive, resilient, and ready for what's next.

## Why training matters

- ✓ **Retain your best people –** Talent thrives where it can grow. Professional development keeps top performers engaged, motivated, and committed to your team
- ✓ **Close critical gaps –** Skills shortages cost time and money. Training fills gaps before they stall projects or derail deadlines
- ✓ **Drive better outcomes –** Certified teams work smarter and faster. They avoid costly mistakes and seize opportunities others miss
- ✓ **Stay competitive –** While competitors scramble to hire, you're developing talent in-house – keeping your business ahead of the curve
- ✓ **Maximise your technology investment –** You've invested in systems. Training ensures they deliver on their promise. Better adoption means better ROI

Upskill faster. Retain longer. Firebrand training accelerates team performance while demonstrating your commitment to the future. Our immersive, results-focused courses equip staff with the skills they need – and the motivation to stay and grow with your business.

# Our courses

Vendor-approved and industry-recognised, with the credentials that prove it.

Explore a wide range of certification and course topics, featuring official credentials from Microsoft, AWS, ISC2, Cisco, EC-Council, and other leading tech vendors.

## Courses by topic

From cloud to cyber, data to DevOps – we cover it all.

- Artificial Intelligence
- Cyber Security
- Data Protection
- Networking
- App, Software and Web Development
- Cyber Crime
- Finance and FinTech
- Auditing
- Data
- Governance, Risk and Compliance
- Risk Management
- Business
- Data, AI and Machine Learning
- IT Fundamentals

- Cloud Computing
- Data Analytics
- Machine Learning
- Operations, Logistics and Supply Chain
- Project Management

# Explore our most popular programmes

From cyber to cloud, project management to pen testing – explore some of our most popular certifications and training courses

# ISC2 Certified Information Systems Security Professional® (CISSP®)

## The World's Premier Cyber Security Certification

Strengthen your organisation's security posture with CISSP-certified professionals.

The CISSP certification validates that an individual has the advanced knowledge and practical skills required to design, implement and manage a robust, industry-leading cyber security programme.

Employing CISSP-certified talent ensures your organisation benefits from professionals who:

- Demonstrate proven expertise across critical security domains
- Apply globally recognised best practices in risk management, governance and security architecture
- Can lead and mature complex cyber security strategies with confidence

By investing in CISSP-certified professionals, you enhance your organisation's resilience, reduce risk exposure and ensure your security programme is led by individuals committed to continuous professional development and excellence.

### Topics covered include:

- Security and Risk Management
- Asset Security
- Security Architecture and Engineering
- Communication and Network Security
- Identity and Access Management (IAM)
- Security Assessment and Testing
- Security Operations
- Software Development Security

# ISC2 Certified Cloud Security Professional® (CCSP®)

## Creating Certified Cloud Security Professionals

Strengthen your organisation's cloud security with CCSP-certified professionals.

The globally recognised CCSP certification verifies that an individual has the advanced technical expertise required to design, manage and secure cloud data, applications and infrastructure in line with industry best practices.

Hiring or developing CCSP-certified staff ensures your organisation benefits from professionals who:

- Apply globally established security frameworks, policies and procedures to safeguard critical cloud assets
- Understand how to architect and operate secure cloud environments across multiple platforms
- Can effectively manage cloud risk, compliance and governance in fast-evolving digital ecosystems

- Bring validated, hands-on capability backed by standards created by ISC2 members and cloud security experts worldwide

By investing in CCSP-level expertise, your organisation enhances resilience, reduces exposure to cloud-based threats and ensures its cloud environments are secured by professionals committed to ongoing excellence.

### Topics covered include:

- Cloud Concepts, Architecture and Design
- Cloud Data Security
- Cloud Platform and Infrastructure Security
- Cloud Application Security
- Cloud Security Operations
- Legal, Risk and Compliance

# ISACA Certified Information Security Manager® (CISM®)

## Awarded 2025 Best Professional Certification Program

The Certified Information Security Manager® (CISM®) certification provides employers with leaders who can expertly assess risk, implement effective governance and drive proactive incident response across the organisation. With a strong focus on emerging technologies such as AI and blockchain, CISM-certified professionals ensure your security strategy evolves in line with modern threats and industry demands. By addressing critical challenges like data breaches and ransomware, this certification equips your organisation with the advanced, business-aligned security management capabilities needed to stay ahead of the pace of change.

### Topics covered include:

- Information Security Governance
- Information Security Risk Management
- Information Security Programme
- Incident Management

# IAPP Certified Information Privacy Professional<sup>®</sup> and Certified Information Privacy Manager<sup>®</sup> (CIPP/E<sup>®</sup> and CIPM<sup>®</sup> combined course)

The Certified Information Privacy Professional/Europe (CIPP/E) certification delivers the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe – equipping DPOs to take advantage of the career opportunity this sweeping legislation represents.

## Topics covered include:

- Introduction to European Data Protection
- European Regulatory Institutions
- Legislative Framework
- Compliance with European Data Protection Law and Regulation
- International Data Transfers

The Certified Information Privacy Manager (CIPM) certification arms privacy and data protection professionals with everything they need to establish, maintain and manage an enterprise-wide privacy programme across its entire life cycle. CIPMs know privacy regulations, and they know how to make them work for their organisations.

## Topics covered include:

- How to create a company vision
- How to structure the privacy team
- How to develop and implement a privacy programme framework
- How to communicate to stakeholders
- How to measure performance
- The privacy programme operational life cycle

Combined, these two certifications, both certified under ISO standard 17024:2012, help you operationalise the GDPR.

# PMI Project Management Professional® (PMP®)

The globally recognised project management qualification

Demonstrate your teams' ability to lead projects in any industry with this globally recognised certification and open the door to a world of opportunities. The Project Management Professional® certification acknowledges candidates who are skilled at managing the people, processes, and business priorities of professional projects.

## Topics covered include:

### People

- Develop a common vision
- Manage conflicts
- Lead the project team
- Engage stakeholders
- Align stakeholder expectations
- Manage stakeholder expectations
- Help ensure knowledge transfer
- Plan and manage communication

### Process

- Develop an integrated project management plan and plan delivery
- Develop and manage project scope
- Help ensure value-based delivery
- Plan and manage resources
- Plan and manage procurement
- Plan and manage finance
- Plan and optimise quality of products/deliverables
- Plan and manage schedule
- Evaluate project status
- Manage project closure

### Business environment

- Define and establish project governance
- Plan and manage project compliance
- Manage and control changes
- Remove impediments and manage issues
- Plan and manage risk
- Continuous improvement
- Support organisational change
- Evaluate external business environment changes

# Microsoft Certified: Azure Solutions Architect Expert (AZ-104 and AZ-305)

## Creating Certified Cloud Security Professionals

At Firebrand, we were awarded the Microsoft Solutions Partner for Data & AI (Azure) and Infrastructure badges in recognition of our expertise in delivering quality solutions in this specialised business area.

The Microsoft Certified: Azure Solutions Architect Expert certification equips professionals with the advanced skills needed to design, implement and maintain secure, scalable and efficient Azure solutions across your organisation. From architecting virtual infrastructure to developing

integration strategies and overseeing cloud operations, this certification ensures your teams can effectively build and optimise end-to-end Azure environments. It validates deep expertise across compute, network, storage and security capabilities within the Microsoft Azure cloud, giving employers confidence that their architects can deliver robust, future-ready cloud solutions aligned to business and operational goals.

### Microsoft Azure Administrator Associate AZ-104

This certification validates your teams' ability to manage and maintain Microsoft Azure environments. It focuses on core administrative tasks such as:

- Implementing and managing Azure identities and governance
- Deploying and managing Azure compute resources
- Configuring and managing virtual networking
- Monitoring and backing up Azure resources

This course equips IT professionals with the skills to handle day-to-day Azure operations, ensuring secure, efficient, and scalable cloud infrastructure management.

### Microsoft Designing Microsoft Azure Infrastructure Solutions AZ-305

This certification focuses on advanced design skills for Azure infrastructure. It covers:

- Designing identity, governance, and security solutions
- Creating data storage and integration strategies
- Designing for business continuity and disaster recovery
- Planning for deployment, migration, and scalability

This course validates the ability to design secure, reliable, and efficient Azure infrastructure solutions that align with business requirements, ensuring optimised performance and resilience in cloud environments.

Learners are also prepared for Exam AZ-104: Microsoft Azure Administrator and Exam AZ-305: Designing Microsoft Azure Infrastructure Solutions.

There is also the option of taking the exams separately. Once both are completed, learners automatically achieve the Microsoft Certified: Solutions Architect Expert certification.

# Certification exams and expert support

## How does the Certification Guarantee work?

Our Certification Guarantee gives your organisation confidence in every training investment. If an employee doesn't pass their exam on the first attempt, they can repeat the course at no additional training cost. The guarantee ensures that your people receive the support they need to succeed, with minimal disruption to your business. If learners don't pass first time, train again for free – just cover accommodation and incidental costs.

Most Firebrand courses include all the exams required for certification. Learners take these exams during the course because Firebrand is both an official training and test centre.

Learners can attend the same course as many times as needed within 12 months. This guarantee applies to both residential and online live courses.

Think of it like a warranty – we can't promise learners never fail, but we guarantee to support them until they succeed.

# Invest in your business' future, your way

Firebrand's flexible training solutions give you smart, tailored pathways designed around your goals.

## Flexible budgeting

Train the people you need, when you need them – while saving up to 20% with Firebrand Passport. Perfect for scaling learning across corporate tech teams.

- Access exclusive corporate rates based on your upfront commitment
- Benefit from the same accelerated training Firebrand is known for
