

Data | Applications | Integration | Automation | Reporting

We help organisations unlock the value of their data and technology.

Our Services

Application Development

- Enhance off-the-shelf software with bespoke functionality
- Build custom portals, CRM, and case management systems to match your workflow
- Integrate disconnected systems for a single, seamless experience

Business Intelligence

- Turn disconnected data into live dashboards, reports and forecasts
- Automated BI tools to reduce reporting time and increase accuracy
- Tailored scorecards and customer models to help segment, target and prioritise data

Automation

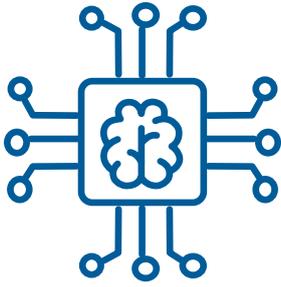

- Replace repetitive processes with intelligent automation
- Scale operations without adding headcount
- Integrate with existing systems to minimise disruption and maximise value

Delivering smart, scalable solutions on time and on budget.

Who We Are

ResX works with you to improve how your systems and processes perform using data-driven, AI-enabled solutions that deliver long-term value.

Connecting disjointed systems

Bridging gaps between legacy platforms and modern technology

Uncovering and segmenting insights from your data

The Benefits We Deliver

Save time: reduce repetitive tasks

Gain clarity: unify data and systems into a single, trusted source

Drive business growth: provide actionable data-driven insights

Enhanced efficiency: optimise workflows through automation

Scale effectively: systems that keep up as your business grows

Reduce risk: improve accuracy, compliance and data integrity

Our Approach

Every project starts with an honest conversation about what's not working.

By conducting a thorough review of your existing technology, we design the right systems and solutions to best suit you.

Delivering smart, scalable solutions on time and on budget.
