

Maximise financial visibility and profitability with Dynamics 365 Finance

Automate and streamline financial transactions, track performance in real-time, predict outcomes and make data-driven decisions.

Why implement Dynamics 365 for Finance?

1. **Intelligent budget proposals:** Reduce the time required for budgeting by consolidating and analysing years of historical data with the intelligent budget proposal feature.
2. **Project your cashflow:** Actively monitor cash flow, recognise current and future patterns, and make data-driven decisions with a cash flow forecasting solution.
3. **Comply with local tax regulations:** Simplify tax calculation, electronic invoicing, and global payments with a guided, rules-based chart of accounts and no code/ low code globalisation services.
4. **Predict customer payments:** Reduce write-offs and improve your margin by forecasting when or whether customers will pay their invoices.

How Dynamics 365 for Finance can help you lean towards sustainable finance transformation

- Evaluate your business health and improve financial management to drive agility and growth using financial reporting, AI-powered insights, and accurately projecting your cashflows.
- Integrate financials into one core process and automate tasks to increase productivity, assist evolving business models and maximise financial performance.
- Effectively manage credit and collection processes, close books faster, and simplify global financial management with in-depth reporting capabilities, financial intelligence, and embedded real-time analytics.
- Simplify regulatory reporting, electronic invoicing, and global payments with the guided, rules-based chart of accounts and no-code configuration service.
