

## Besyncly for Sage 200 Professional is a fully cloud-based integration solution that will revolutionise data communication within your business.

The Sage 200 Professional Besyncly connector allows you to connect and integrate Sage with a variety of business applications. With the ability to transfer data in real-time, or at customisable intervals, you have full flexibility to control where and when data is transferred.

## What can Besyncly allow your Sage 200 Professional platform to do?

Streamline and automate processes, giving you more time to focus on perfecting your business.

Automatically sync customers and sales orders to your Sage 200 system.

Export customers and products to other platforms such as eBay and Magento stores.

Handle multiple Sage 200 instances.

Receive email notifications for error reporting.

## The following, and more, can be automated using Besyncly for Sage 200 Professional

IMPORT	EXPORT
Customer	Customer
Supplier	Stock Levels
Stock Item	Supplier
Stock Item Pricing	Stock Item
Order Returns	Customer Transaction
Nominal Transactions	Supplier Transaction
Stock Adjustment	Stock Item Price
Supplier Transaction	Stock Item Discount
Customer Transaction	Order Return

## Main Features and Benefits:

### Save Time and Money

Remove the need for the time-consuming manual transfer of data.

### Make Informed Decisions

Get real-time reports instantly whenever and wherever you are, helping you make fast-paced informed decisions.

### Cloud-Based

Being on the Google Cloud Platform means no need for downloads or updates.

### Integrate Multiple Systems

Connect Sage 200 Professional to multiple business systems.

### Configurable

Customise our off-the-shelf integrations to meet the needs of your business. If we don't already offer the connector you require, we can work with you to produce this.

### Security

Based on the Google Cloud Platform means your data is secure.

### Easy to Set-Up

No need to be an IT expert to get Besyncly up and running with our pre-configured mapping, eliminating costly development and implementation fees.
