- ✓ Over 30 years experience with RFID solutions
- ✓ Live Asset Tracking
- ✓ Real-Time data with flexible, user friendly dashboards
- ✓ Automated data collection
- ✓ Immediate Asset Visibility by location

- ✓ Rich desktop experience
- ✓ Links straight from Mobile App to Desktop
- ✓ Integrations and support for a variety of third party applications

mobile app

Assets Tracked

Items/units RFID tagged and tracked. Detect when and where your stock has moved with a full audit trail available

Digital Pick Lists

Increase speed and accuracy of picks with instant validation of product and location. Compatible with a range of handheld devices for mobile use.

Dashboards with Real Time Data

Dashboards give real-time visibility of stock levels alongside movement of goods

Product Traceability

Have complete traceability of product throughout the warehouse. LIFO, FIFO, short dated stock, out of date stock

Flexible Location Setup

Know exactly what stock you have across multiple locations

Configurable System

Software allows set up of locations or asserts based on your individual business requirements

Cloud Hosted

Microsoft Azure Cloud hosting. Accessible anytime, anywhere and highly scalable. Securely connected to cloud host via handheld/mobile devices

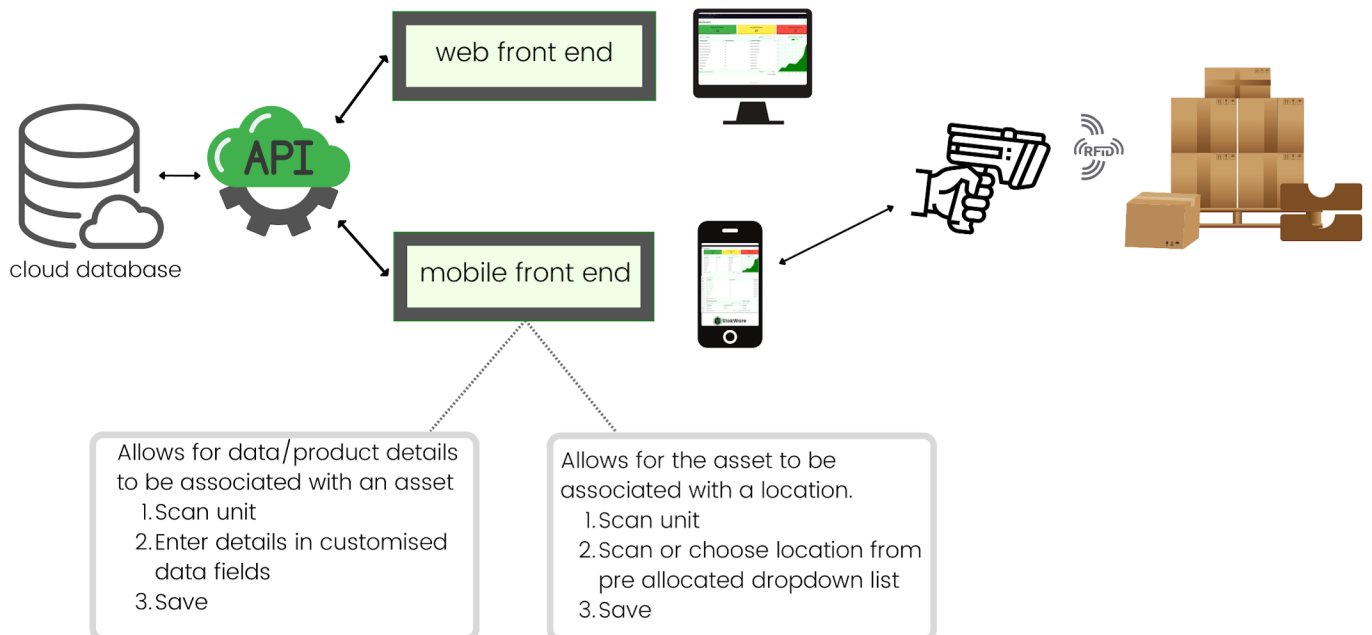

CSV Data Download

User friendly data available to be downloaded for reports at any moment

Multiple Users

Various user account packages available.
 Basic - 5 users
 Medium - 5-15 users
 High - +15 users

Software Architecture

StokWare is built using a RESTful API architecture. Built on .NET 6 MAUI and runs seamlessly across all mobile platforms, Windows, Mac and other desktop platforms.
