

FLOW MYNA

Growth leads to lost visibility

What starts simple becomes a **tangled web of systems and teams** hiding the root cause of issues.

Interviews are based on **human perception**. **Metrics** provide surface-level numbers but **miss** the hidden **rework loops, delays and manual workarounds**.

This lack of clarity leads to negative business outcomes

The Solution: Flow Myna's AI-Powered Process Mining

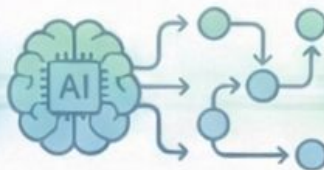

We turn your **existing systems data** into a map of reality by connecting the digital trail in your systems to **visualize** your **end-to-end** processes.

We remove technical barriers so users can access insights in minutes

Step 1: Upload system log data or use our public API.

Step 2: Our AI maps your process and identifies key insights.

Step 3: Ask questions in plain language and explore with our AI Copilot.
