

# Transforming Business Operations

[Get Started](#)

## OVERVIEW

At Catalyst ERP we don't just sell NetSuite Cloud ERP. We make sure you understand what it will cost, how long will it take to be delivered and ensure you get the most from transforming your business operations.

Revel in your unique business needs with a 4 step implementation methodology that is created around the process of Understanding, Designing, Planning and Delivering a customised instance of NetSuite

### UNDERSTAND

We work with your team to understand the business drivers, IT requirements and overall solution deliverables. Through a discovery and analysis phase, we are able to quickly identify an understanding of the existing technical environment and suggest an overall solution.

### DESIGN

Once your requirements have been assessed and understood, a collaborative Business Requirements Document is created. This formulates the design of your implementation.

### PLAN

A decisive project plan which is accurate in both time and investment will be agreed before the implementation starts. This process establishes the timeline, identifies key resources, and responsibilities for the internal and external teams.

### DELIVER

Catalyst's expert consultants are put into action to build and seamlessly deliver the required solution(s). Our services include training and user education to ensure a seamless transition between your current system into your new environment can be achieved and exceeded.

## WHY WORK WITH CATALYST

The key to our customer success is the team of people that we have brought together and continue to nurture. Our consultants, developers, commercial and operational staff are all pivotal to the customer journey. Because we all put the customer at the centre of everything that we do, we will continue to help exceed your growth expectations.

Our expertise lies in our people and our team of developers and consultants who have many years experience in Online Retail, Manufacturing, and Wholesale & Distribution.

Our certified NetSuite consultants have developed a range of SuiteApps to extend your NetSuite for industry and business.

How NetSuite and Celigo turned 'the lights on' at Lights4fun  
Discover how automating information flow from the multiple market places into their finance system, has helped grow Lights4fun into a £50M+ turnover business.
