

Digital Intelligence for Manufacturing Efficiency

Tech Research & Innovation Ltd (TRI) is a UK SME specialising in computer-science research and advanced digital technologies. We develop AI-driven and data-analytic solutions that make manufacturing more efficient, sustainable, and productive.

What We Do:

- Use data and AI to identify waste and energy inefficiency.
- Support manufacturers in process optimisation and predictive maintenance.
- Create flexible, low-cost digital tools for SMEs across all manufacturing sectors.

Current Focus:

TRI is exploring collaborative feasibility projects to help UK SME manufacturers adopt digital intelligence for resource and energy efficiency under Innovate UK programmes.
