

### Are you ready to create your first RPA bot?

Robotic Process Automation imitates user actions in business software and automates workflows to enhance productivity and facilitate low cost digital transformation and innovation.

Datatrainer partner ElectroNeek is a cutting edge RPA market disruptor with a proven track record of providing customers with cost-efficient RPA solutions.

"The pandemic and ensuing recession increased interest in RPA for many enterprises. We predict that 90% of large organizations globally will have adopted RPA in some form by 2022 as they look to digitally empower critical business processes through resilience and scalability, while recalibrating human labour and manual effort."

Gartner, September 2020

### **RPA INNOVATION ADOPTION INITIATIVE FOR Q1 2021**

Datatrainer are looking for a limited number of innovative, ambitious, medium sized businesses to join us in our efforts to accelerate the adoption of this productivity enhancing technology and make a positive start to 2021.

There are countless opportunities for RPA within back and front office areas and across numerous industries beyond those that have already successfully applied it such as banking.

Work smarter not harder and learn how to do more with less.

To find out more (including the possibility of funding support for eligible businesses via the Sheffield City Region Growth Hub), please contact us on 07545612488 or email tim@datatrainer.co.uk
