

# Your operating model, mapped and always current.

One platform for processes, systems, teams, rules and data - with AI on your side.

Yone Process Intelligence gives your business the capability to document how operations run - processes, systems, teams, rules and data - all in one place. **Audits ready. Bottlenecks visible. Knowledge stays in the business.**

## THE PROBLEM

### Operations run on scattered knowledge

Most organisations cannot show how they actually work. Processes live in people's heads, in email threads, in outdated documents. When something goes wrong - an audit, a resignation, a system change - the knowledge gap becomes expensive. You cannot improve what you can't see.

## THE SOLUTION

### One place for your operating model

Yone gives operational teams a structured platform to map and maintain how the business works - end to end. From process hierarchy to BPMN diagrams, from business rules to system landscapes. AI enriches your documentation as you build. Every team member works from a single, trusted reference.

## WHAT'S INSIDE

### Key capabilities

#### Process Framework

Full L0-L1-L2 hierarchy, from top-level processes down to activity level.

#### BPMN Diagrams

Swimlane diagrams with rules, failure points, metrics, data flows and system links.

#### AI Enrichment and Analysis

AI proposes steps, rules and gaps. Chat with your operating model in plain English.

#### Systems & Data

Map every system and capability. See how processes, teams and technology connect.

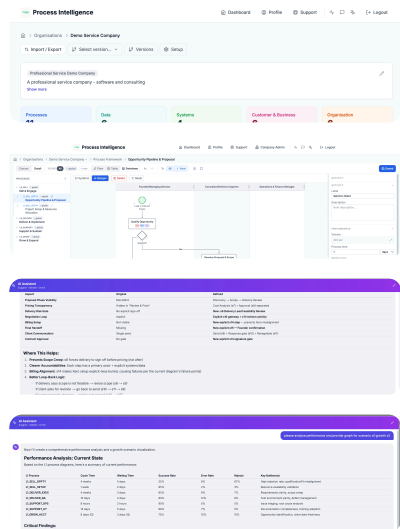

#### Improvement and Project Analysis Tools

Analysis tools supported by AI in your very own business context (Fishbone, FMEA, Fault Tree Analysis, Document Analysis).

#### Documentation Repository

One place for all process documents and evidence, linked to the live model.

## WHERE IT APPLIES

### Common use cases

#### VALUE STREAM

##### New Product Development

Map the end-to-end flow from idea to launch. Clarify handoffs, gate decisions and system dependencies across teams.

#### VALUE STREAM

##### Lead to Cash

Document the full commercial process - from opportunity to invoicing. Identify bottlenecks, rules and integration points.

#### VALUE STREAM

##### Quality Management

Structure your quality processes, link controls to activities and maintain evidence in the model - not in spreadsheets.

**Know your operation.  
Prove it. Improve it.**

Start documenting your operations today.
