

# Climate change is moving faster than we are

2/3 of businesses have no plan for sustainability and climate change disclosure regulations like CSRD, ESRS, SEC are pressuring businesses to report on their supply chains

## 1. Learn

Despite 81% of millennials believing business has a key role to play in achieving the SDGs, the majority of businesses are not yet acting. **SDG Assessment Level 1** and [Cities4SDG Learning Tool](#) develop with Leading Cities to support organisations to **Learn** how to take advantage of this business opportunity.

## 2. Develop

98% of Businesses are SME's, integrating sustainability strategy to improve operational efficiency alone can boost profits by as much as 60%.

**SDG Assessment Level 1** provides an initial first step to **Develop** a sustainability/ESG performance reporting culture for small businesses. One of our customers achieved over £173,000 funding using our App [CASESTUDY HERE](#)

## 3. Implement

There is limited progress towards SDGs and Agenda 2030. **SDG Assessment Level 2** helps organisations who have established reporting basics to identify sustainability issues that affect operational strategy, providing decision makers with an indication of organisational Risk Maturity Levels in relation to UN SDGs. Giving leaders the flexibility to fully **Implement** data driven strategic decisions.

## 4. Optimise

As the world faces mounting environmental challenges, corporations are increasingly recognising the need to adopt sustainable practices. Sustainability Performance Framework (**SPF+**) **Scorecard** gamifies the reporting of SDPIs allowing your organisations to **Optimise** with data driven decision making and is easy to implement throughout your value chain.

## 5. Sustain

EU Corporate Sustainability Reporting Directive (CSRD) & ISSB standards are challenges and opportunities for businesses. Obtaining data from those hard to reach areas of your supply chain is often impossible leading to cost increases. **Sustain** a competitive edge with a dynamic view of your supply chain activity with **SDG Assessment Enterprise Level** Digital measurement, reporting and verification compliant with International Standards.

**What are SDPI's** SDPIs are a set of metrics used to measure progress towards the United Nations' Sustainable Development Goals (SDGs). The SDGs were adopted by the UN General Assembly in 2015 and provide a framework for addressing global environmental, social and economic challenges. The SDPIs cover a wide range of topics, including poverty, hunger, health, education, gender equality, clean water and sanitation, affordable and clean energy, and climate action, among others.
