

Quotes

Send clear and professional quotes with 1 click

With the CRM application, you create estimates using price lists in square meters, cubic meters, matrix lists and linear meters by section. You can calculate the Uvalues of your windows and add attractive branded designs for your quotes. You can manage real-time contact with customers. Thanks to Archimede you avoid errors and waiting time. Take care of your customers, Archimede takes care of your time.

Sellers

Archimede Lite System

Monitor sales statistics. You can update agents and resellers in real time. You can provide them online tools (Archimede Lite) to simplify procedures and focus on the customer. Thanks to Archimede, managing your sellers is easier and faster. Connect your business network.

Analysis

Optimise time and costs at every stage

Calculate production costs and sales margins for each job automatically. You are provided with up to date figures. You have the best information available to manage each job individually and plan accordingly. Thanks to Archimede you avoid waste. Make your business more competitive.

Invoices

Get invoices and delivery notes directly from order confirmations

You can monitor invoiced jobs and those to be invoiced. With an internal schedule, you can monitor all payments for deliveries. Thanks to Archimede, you can forecast cash. Invoice administration is aligned with production.

Flexibility

Create projects easily and quickly

You can create windows, doors, shutters... by setting few parameters, in few seconds. You have a library of default and customizable models, but you can also start from a photo! With Archimede you have a dedicated design environment. Get creative!

Opening

For each project you can set joints, sections, overlappings, rebates, scraps.

You can break up complex arches, get detailed and customizable prints of pieces, glasses, panels, both for single projects and entire orders. In Archimede all project data can be modified freely, thanks to an intuitive next generation interface.

Sections

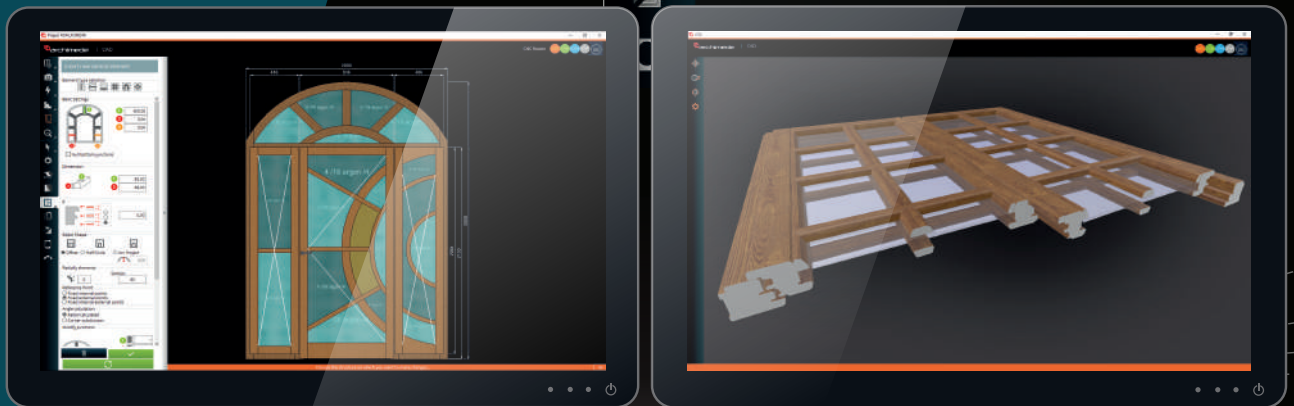

Export sections with a click

With Archimede's CAD applications you can view in real time the horizontal and vertical sections of the window that you are designing. In the correct scale, printable and exportable in DXF format. With Archimede you can satisfy instantly and automatically even the most demanding architects and surveyors.

3D rendering

Photorealistic preview of the finished product

Create and print photorealistic images of the window you are designing, while you are designing it. You can compose, break up and animate 3D views and show them to the customer. With Archimede you satisfy the customer right from the project.

Versatility

Manage all machinery, of any brand

Crosscut saws, clamping machines, routers, lines... SCM, Homag, Biesse, Weinig, Saomad, Working Process, Masterwood ... We have collaborated for over 20 years with the major CNC machine constructors and joineries all around the world. Archimede's CAM functions satisfy every need. With Archimede you have one single program to manage all machines of your production cycle.

Production prints

Export working lists for each department

Get cutting lists, assembly lists, and lists of glasses with a click. You can export entire orders or single projects: pieces, panels and glasses in DXF format. Thanks to Archimede you avoid waste and delays. Make your business more efficient.

Simulations

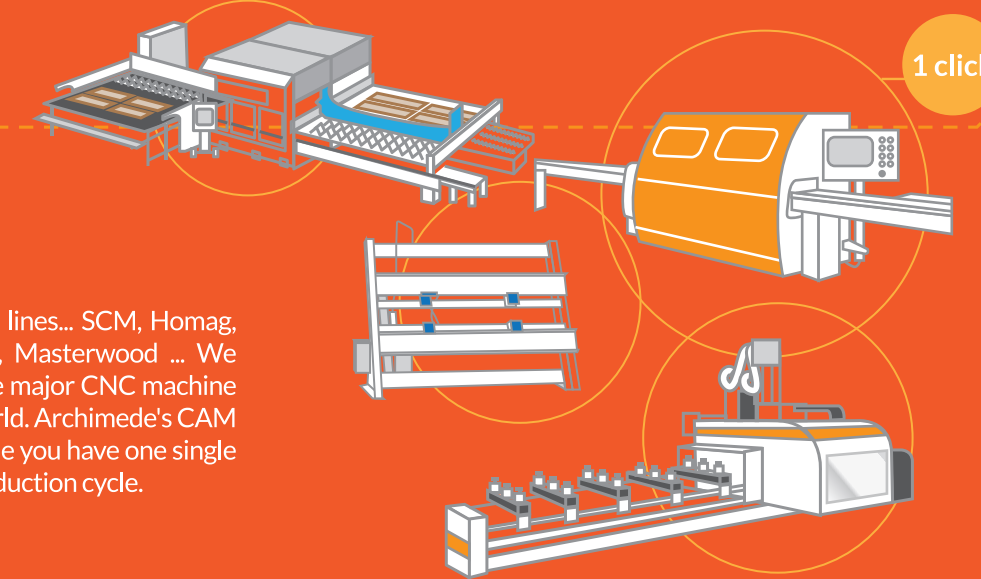

Get 3D simulation of machining

You can simulate in advance the operations of your machinery. You save time and material for tests, prevent interruptions and collisions. Archimede not only an advanced simulator, it is also the only software which has a real ISO interpreter. Thanks to Archimede workings are faster and safer.

Production cycle

Synchronize all the production phases

You can define the phases which make your production cycle and for each phase you can decide the support prints for your operators. You can decide how to sort and group the pieces within each production station. Archimede will calculate the necessary scraps for each piece in the passage between the work phases. With Archimede you have one single program to synchronize all the phases of your production cycle.

GLASS LIST

Save trees! Use wood in smart way

Stock

Manage inventory and purchases

Archimede monitors availability and orders of all materials. When you transform a quote into an order, Archimede automatically exports the list of wood, glass, hardware, paint, aluminum, pvc and necessary packaging. Archimede knows exactly what you need and when you need it, so it allows you to keep your stock lean.

Schedule - calendar

Plan times and deadlines for workings

When you enter an order, Archimede synchronizes all information about operators, machines and materials and calculates the time necessary to complete it. You can view the default times of each phase and modify them if necessary, the special Gantt calendar will automatically update. With Archimede each delivery has certain times and you can simulate in real time the management of unexpected events.

Operators

Manage operators' shifts

Archimede's ERP applications calculate mantime and machine-time necessary for each working phase. Shifts and tasks are always optimized according to workflows. Thanks to Archimede each worker always knows what to do and when to do it.

Archimede App

Android devices application

Each operator can use the smartphone as a barcode reader or loading and unloading material from the warehouse. Each operator can trace the duration of the activities he carries out during the day and so you can know in real time the progress of orders. Thanks to Archimede you can measure and improve the performance of your joinery and respect deliveries.

1 click

Save trees!
Use wood
in smart way

WHY IS archimede THE BEST SOLUTION FOR YOU?

DAY TO DAY WORK

With Archimede, you choose the project from the library, you decide size, number of sashes and opening... STOP! Everything else is automatic.

MANAGEMENT OF CNC MACHINES

Archimede has directly exported the files for each type of machine for over 20 years.

INTERFACE

User-friendly ultra-modern interface, the result of research to ensure immediate and intuitive use.

COMPLETE

Archimede is the only software for windows and doors which carefully satisfies all joinery departments.

OPEN

You can insert, modify, copy products, prints, workings without having to use Kosmosoft services.

CONTINUOUS INNOVATION

Measurements from photographs, photorealistic render to help the sale, applications for smartphones. The result of continuous investment to stay ahead of the competition and look to the future.

MODULES

Archimede allows you to customise which modules you need and adapts perfectly to your joinery business.

MULTI-REGIONAL DESIGNS

You can design and produce specific types of windows and doors for any country in the world.

SPECIALIZED SUPPORT

Our technicians, constantly updated, have been window and door industry specialists for more than 20 years. Technicians who only deal windows and doors.

FUTURE

The growth of your joinery business will always be supported by the innovative features of Archimede.

ALL MATERIALS

You can seamlessly design and produce windows and doors in wood, wood-alu, PVC and aluminum.

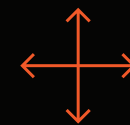

SALES AID
