

TRANSFORMATION SERVICES

Making sure you have business critical information when you need it the most

GROW YOUR BUSINESS WITH THE RIGHT SOLUTION

At Gradient, we understand how much a business system, be that Finance, ERP or CRM, means to you and your business.

But we also understand that sometimes the technology around this can change quicker than you have the time to react, giving you a headache when managing change or upgrading your business systems. With this in mind, we have tailored our services to help you keep in touch with these changes.

A BUSINESS SYSTEM SELECTION SPECIALIST YOU CAN RELY ON

We are specialists in helping our clients review their business systems, define their requirements for the future and finally help select and implement their chosen new solution.

Our Transforming team have decades of experience as consultants, business owners and project managers. Since 1997, we have built up a formidable reputation in the industry for being able to help businesses transform their information systems.

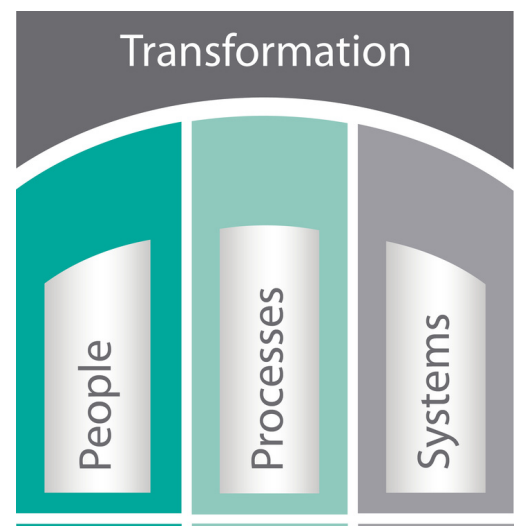

We have an honest and practical approach based on real-world experience and recognise that a successful project that truly transforms a business requires the alignment of people, processes, and systems.

HOW WE CAN HELP

We offer a full range of business transformation services to suit your business needs.

- Business Systems Health Check
- Business System Selection
- Project and Change Management
- IT Due Diligence

BUSINESS SYSTEMS HEALTH CHECK

When you hear the word Health Check, it's natural to think of visiting your GP, clinic or hospital for a check-up to get an overview of your current health. The same thing needs to be said for your business information systems. Neglecting your systems will leave them out of alignment with your overall business strategy and unable to respond to your customers' needs.

IT DUE DILIGENCE

By definition, a comprehensive appraisal of a business undertaken by a prospective buyer, especially to establish its assets and liabilities and evaluate its commercial potential". Where Gradient Transforming's service is concerned, we focus on a full review of assets, systems, processes, policies and procedures related to Information Systems and Technology.

BUSINESS SYSTEMS SELECTION

Gradient Transforming works entirely independently. We have no allegiances to particular vendors. We do maintain healthy relationships with the leading providers, which gives us an advantage in negotiating the best options for your business. We help you select the best business system software and vendor to suit you and your business requirements.

PROJECT & CHANGE MANAGEMENT

Gradient's Project Managers have many years of experience of managing all kinds of projects, from simple technology upgrades to global ERP implementations. Accreditation to relevant Project and Change Management standards mean they offer best practice but with flexibility to suit each client and project.

BUT DON'T JUST TAKE OUR WORD FOR IT!

"We highly recommend Gradient to any company who may be daunted by the thought of making a significant investment in an ERP system and perhaps making the wrong decision. Gradient helped Auto Marine make the right decision"

Amy Bryant, Financial Director, Auto Marine Cable Ltd
