Project Title , Develop and implement tools to gather and display production data

Project Description

We are seeking a talented and motivated summer intern to study, develop and implement tools to be able to gather and display data from our current ERP/MRP. Part of the study we will also be looking to have a report highlighting the best use of AI at present and in future in our business.

Responsibilities:
-   Meet with stakeholders to gather information and inputs into the project.
-   Understand the various business workflows.
-   Study Workguru our current ERP/MRP.
-   Review non added value tasks within the business.
-   Conduct gap analysis between current system and stakeholder expectations.
-   Propose to stakeholders digital tools for visual management, operational and financial controls that can be developed.
-   Develop and implement various digital tools using API's.
-   Prepare a report with proposal to implement AI within the business in stages, and in areas where it can add value, prioritise employee, training and improved communication.

-
