

Accelerating the success of RPA projects.

SilkFlo is a centralized RPA Management platform with a proven framework to drive Digital Transformation across your business at scale.

www.SilkFlo.com

90% Of Automation projects **fail**.

Common problems with RPA programs

Difficult to identify the right opportunities

No standard, data-driven methodology

Takes time to collect ideas from employees

Process documents are decentralised

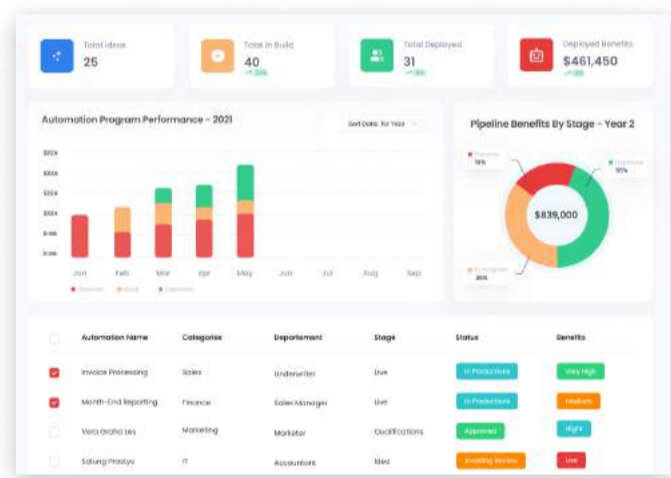

Difficult to measure success of the program

Lack of employee engagement

Increase the success and ROI of your RPA initiative.

Our platform improves successful deployments of Power Automate, UiPath, Automation Anywhere, BluePrism and other leading RPA solutions by up to 75%. SilkFlo supports your Center of Excellence across the Automation lifecycle.

- Collect ideas, then build and manage a great Automation pipeline - ditch spreadsheets!
- Reduce RPA project failure by 75%, let our algorithms qualify ideas for automation potential
- Visualize automation complexity, estimated costs and benefits and **understand your ROI**.
- Track everything from idea to digital robot with a **proven** methodology.
- Work with your process experts **collaboratively**.

How we help you succeed

Grow your Pipeline

Generate ideas from employees and let our algorithms show what's worth automating.

Reduce risk

Our proven framework helps you to understand the potential, cost and ROI before you build RPA.

Measure performance

View real-time performance of your Automation initiative with our analytics

Don't just listen to us!

Every Friday, we used to have 7 RPA Business Analysts working on maintaining RPA project data on spreadsheets. With SilkFlo, analytics are built-in. We saved over £5,000 per month on that task alone!

- Head of RPA, a leading UK retail group

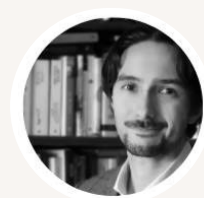

Early Adopter Program

Gain access to earlybird prices. Support, guidance and training.
