TABLE OF CONTENTS

WHAT WE ARE

An experienced growth team delivering change management through data and AI. Trimontium ai is dedicated to empowering businesses like yours by breaking silos and fostering data-driven operations, ensuring meaningful growth through strategic change management enabled by advanced technology. Our Mission is to enable you to make better, faster decisions by integrating AI and human insights.

WHO ARE WE

Mark Kuhillow

Specialist in using AI and analytics to drive scalable commercial growth across data-driven service models.

Dr Peter Appleby

Senior AI leader with deep expertise in machine learning, predictive modelling, and applied analytics, delivering data clarity and automation.

Colin Telford

Operational lead, ensuring projects are fully delivered professionally and within agreed timeframes.

Deborah Holmwood

Specialist in brand, change management, and communications, enabling transformation through engagement and cultural buy-in.

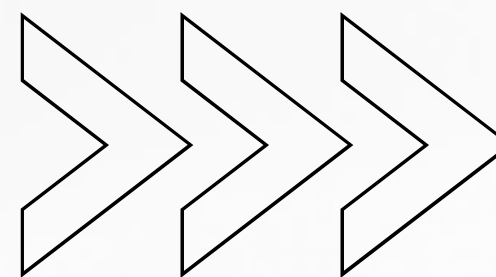

Supported by an extensive team of Developers, Data Scientists, Business Development Executives and Delivery Managers.

WHAT

WE

ARE

NOT

A CONSULTANCY THAT FAILS TO DELIVER

TRIMONTIUM AI BELIEVES IN THE POWER OF PARTNERSHIP. WE ARE DIRECT AND HONEST IN ALL OUR CLIENT DEALINGS. IF WE CANNOT SUCCEED WE DO NOT UNDERTAKE THE COMMISSION.

WE ARE HAPPY TO BE JUDGED ON OUR OUTPUTS AND ARE EXPERIENCED AND AGILE ENOUGH TO BE A SAFE PAIR OF HANDS WHENEVER WE ARE REQUIRED, WITHOUT THE LUMPY RETAINERS.

WE ARE NOT HERE TO FAIL - FOR OURSELVES OR OUR CLIENTS.

OUR APPROACH: THREE PILLARS OF PARTNERSHIP

GROWTH ADVICE

We conduct structured audits to identify opportunities for AI and data utilisation, providing data-backed recommendations that can enhance our client's business operations and drive growth across all sectors.

AI INTEGRATION

Our bespoke dashboards seamlessly integrate with existing systems, ensuring that tailored solutions are designed through thorough gap analysis, leading to effective implementation and utilisation of AI tools.

CHANGE MANAGEMENT

We offer ongoing partnership through change phases, providing training and support to ensure sustainable adoption of new practices, empowering teams to embrace innovation and enhance productivity.

OUR SERVICE PORTFOLIO

TAILORED SOLUTIONS FOR YOUR BUSINESS

- **Discovery Audit:** Assessing data readiness and opportunity across our client's systems.
- **Governance & Data Due Diligence:** Ensuring compliance and confidence across datasets.
- **AI Strategy & Forecasting:** Identifying where automation and prediction can deliver commercial efficiency.
- **Integration & Dashboards:** Unifying group-wide reporting through TriMetrics.
- **Deep Technical Expertise:** Building capability across AI, analytics, and transformation.

TRIMETRICS **TRUE VISIBILITY**

TriMetrics is Trimontium ai's proprietary data and AI framework that connects strategy, operations, and performance in one coherent view. It integrates data from across the business, from finance to people to customer touchpoints, and transforms it into actionable insight for leaders.

By revealing how decisions flow through the organisation, TriMetrics helps Boards and Executives see what's driving results, where friction exists, and where the next opportunity lies. The result is faster, evidence-based decision-making and measurable business improvement, without adding another complex system to the stack.

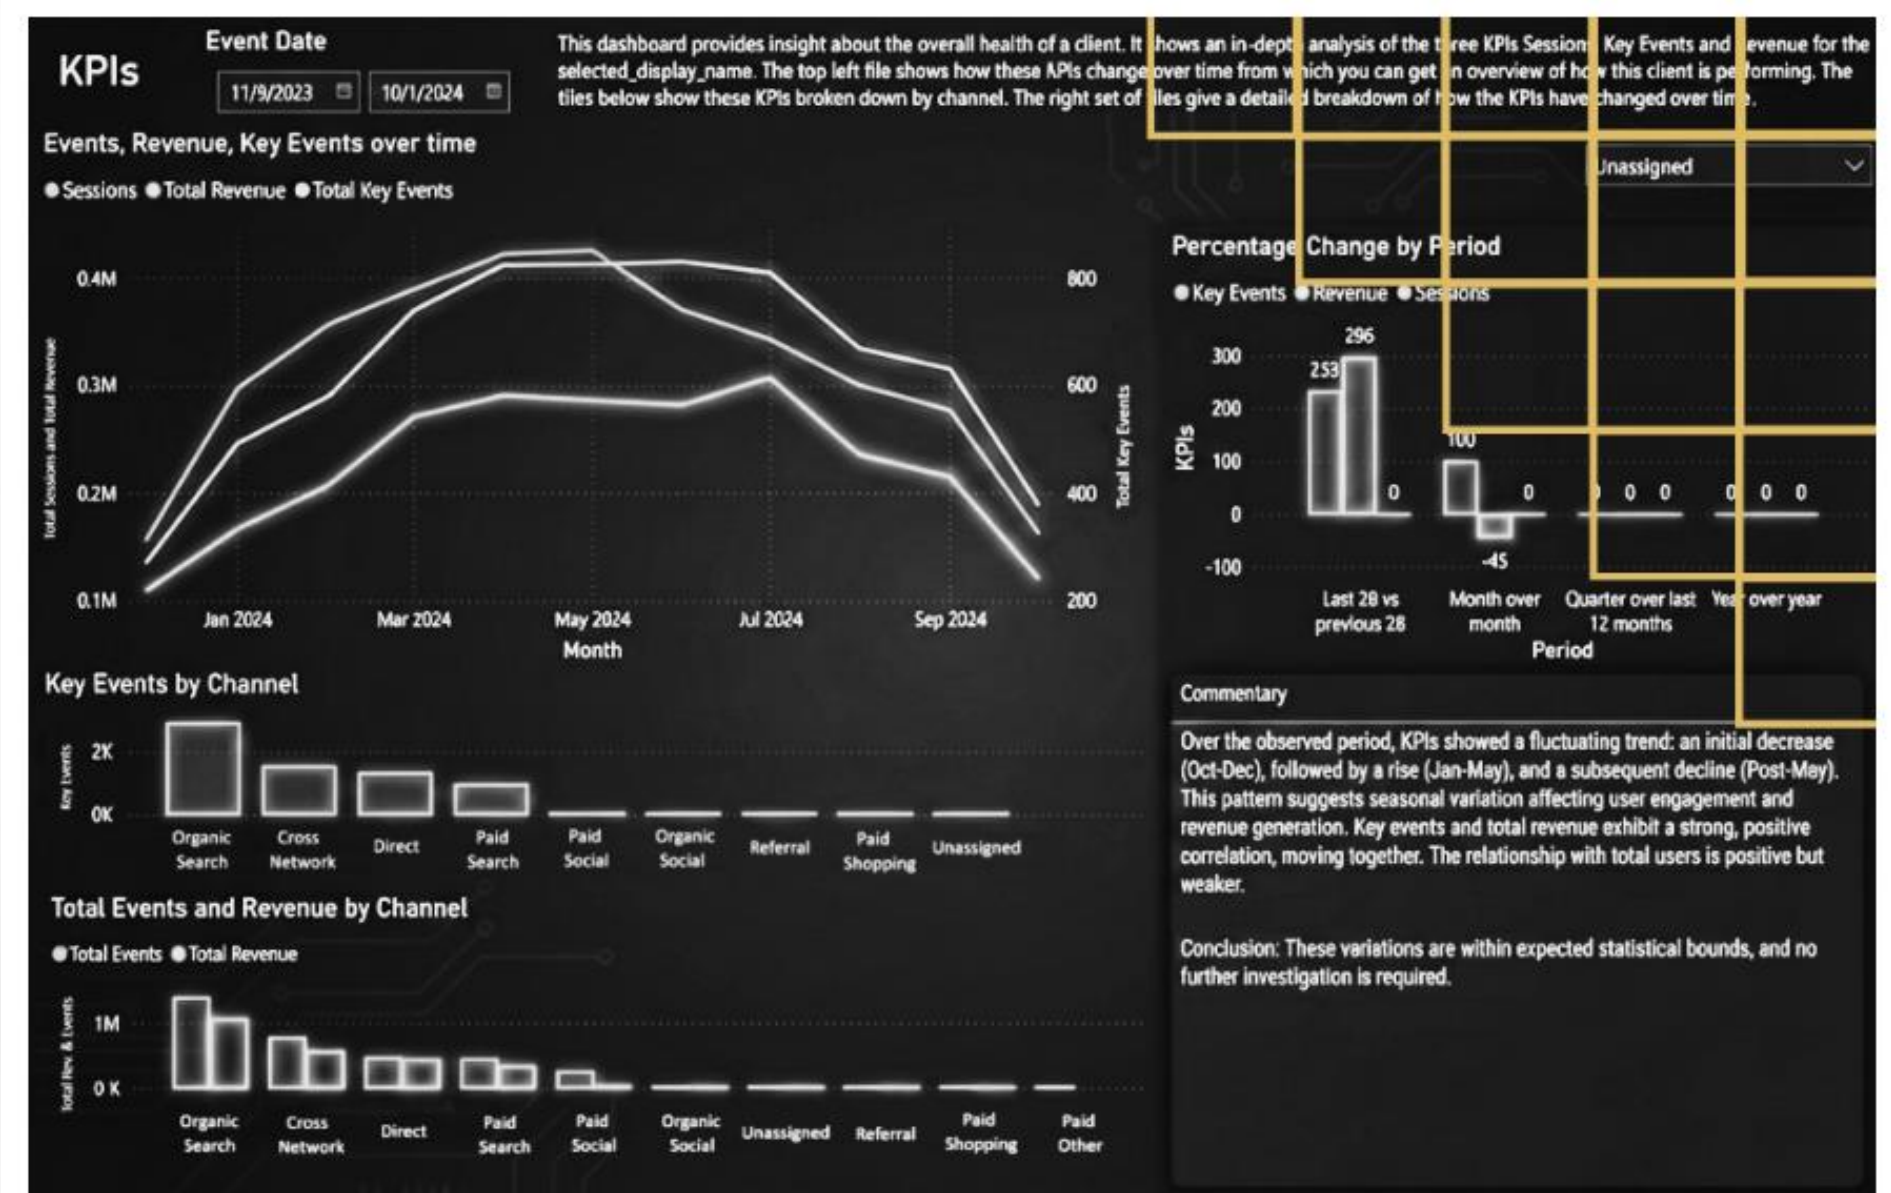

DATA-BACKED DECISION MAKING

CURRENT DECISION MAKING

This leads to siloed reports that do not overlay data from other areas of business – reducing strategic oversight, speed of decision making, obvious risk bumps or efficiencies.

DECISION MAKING WITH TRIMETRICS

Allows for holistic reporting that merges data points and AI programmes, giving instant, time relevant reports that provide decision makers with single-source evidence. Giving confidence and accuracy in decisions.

OUR ROLE

Trimontium ai delivers transformational change through the intelligent use of data and AI.

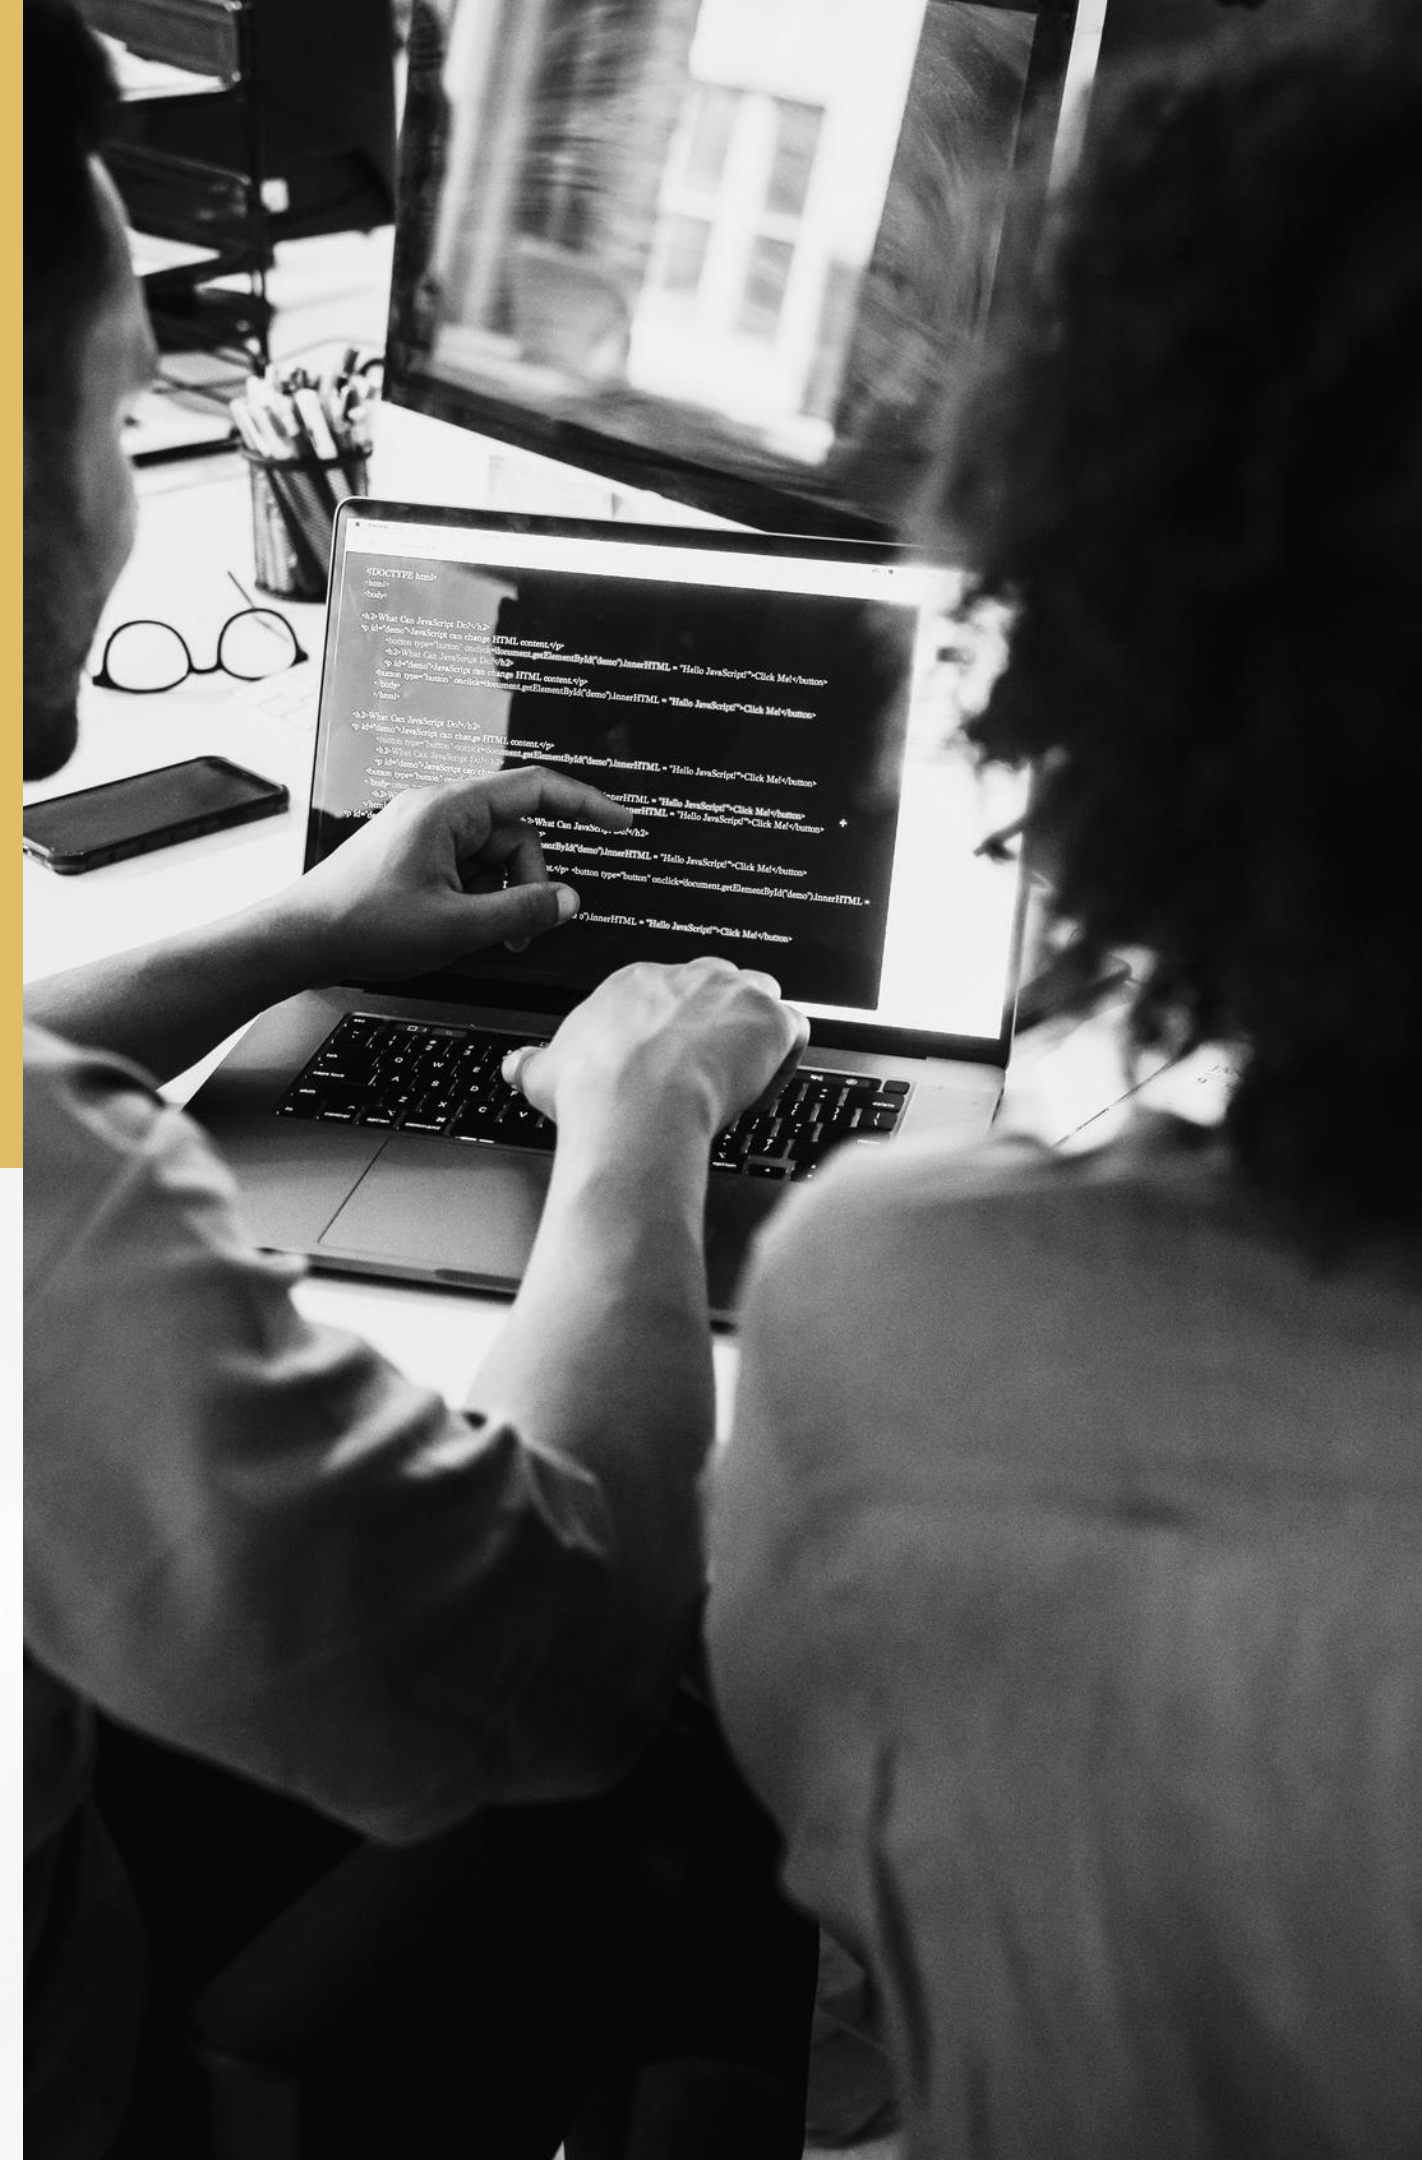

We partner with businesses to help them evolve how they operate, compete, and grow.

While our experience spans multiple industries, we have a particular depth in e-commerce, professional services and manufacturing, where the ability to connect insight with execution delivers measurable impact.

OUR PROMISE

**At Trimontium ai, our promise is simple yet powerful:
We enable smarter, faster decisions that drive sustainable
growth and innovation.
Every recommendation we make is grounded in data,
ensuring leaders can act with confidence.
Our approach blends data-backed insight with strategic
clarity, helping organisations refine their strategy,
increase operational efficiency, and build a foundation for
long-term success.**

**THANK
YOU**
