

**Project Title** AI-Assisted Induction Video Creation

**Objective:** Streamline induction video production by leveraging AI to scan historical footage and auto-generate video content based on a provided script.

**Tasks & Responsibilities:**

- Develop a system to scan and categorise historical induction footage.
- Implement AI-powered script analysis to match relevant video clips.
- Automate clip selection and sequencing to align with the script structure.
- Integrate voice-over and subtitles for a complete induction video.
- Optimise workflow for efficient content repurposing and faster video production.

**Duration of Internship**

Flexible between 8-12 weeks
