

AI & Digital Efficiency Accelerator

A practical adoption programme for UK manufacturing businesses

Focused on productivity, margin protection, and better use of skilled people.

AI and automation applied only where they deliver measurable value.

⚙️ How the Programme Works

1. Diagnose Friction

Identify where time, money, or accuracy is leaking.

2. Stabilise & Govern

Set safe, responsible rules for digital and AI use.

3. Implement Automation

Remove repetition. Improve consistency. Protect margins.

4. Embed Capability

Train teams. Document workflows. Build independence.

Aligned with Made Smarter objectives: productivity, adoption, capability.

POPULAR PROGRESSION
