Our Mission

Supporting organisations on their journey to net zero

Providing sustainable and intelligent solutions

Implementation of friendly, simple and affordable solutions

pilot group

thepilotgroup.co.uk
0333 034 2104

We specialise in temperature and environmental control for commercial customers

What is an Energy Management System

- Provides control of your Site Temperature
- Easy access to your estate
- Delivers cost savings
- Visibility and centralisation
- Works with any heating type

Why is it important

- Heat reduction is key to reducing CO2 emissions
- It's a starting point for reaching net zero
- Helps to save our planet

How does it work:

- Target Temperatures
- Role Based Access
- Burner Optimisation
- Heating/Cooling control
- Calendar Scheduling
- Pre-heat optimisation
- End time optimisation
- Roller Door Integration
- Fall Back Temperatures
- Tamper proof units
- Override functionality
- Fault detection
- Weather compensation
- Inbuilt panel intelligence

We will help you optimise your Cost + Carbon + Comfort

Selco

Install price: £8,000*
Savings: **25-40%***
Payback: 16 months

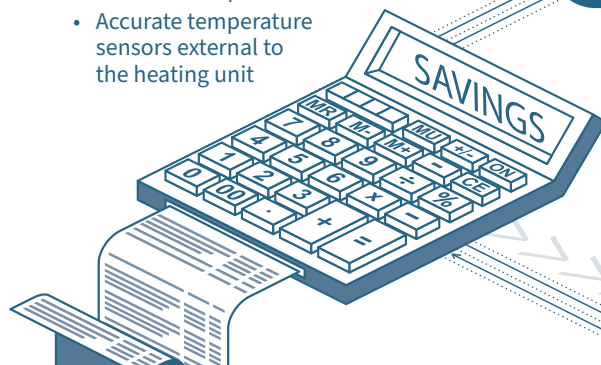

*Average over various sites

Carpenter and Paterson

Install price: £26,000
Savings: **52%**
Payback: 12 months

How we save you money

- Centralised control of your heating and cooling
- Residual Heat Utilisation
- Calendar scheduling of your working environment
- Pre-heat optimisation via self-learning algorithm
- End time optimisation
- Door switch integration
- Integrated Lighting control solution
- Weather compensation
- Accurate temperature sensors external to the heating unit

Further Support and Benefits

- Annual service agreement
- View trends and access data
- Customise each zone
- Alerts for changes
- Role based access
- Multi-site solution
