

# EDRMedeso Startup Program

The Ansys Startup Bundles combined with our support from the care program equips the startup ecosystem with full access to multiphysics simulation software at affordable prices, to help you solve your engineering challenges quickly and cost-effectively.

## Simulation Enables Engineers to:

**Manage Complexity**

**Drive Innovation**

**Increase Quality**

**Lower Cycle Time**

**Reduce Cost**

**Eliminate Risk**

## Why Simulation?

Simulation helps early-stage startups grow their businesses while reducing physical prototype tests.

It also offers the chance to explore and experiment, allowing engineers to develop their products to be the best that they can be.

## Support for Startups

No matter where you are on your startup journey, we're here to support and assist you. To this end, we have tailored the EDRMedeso Customer Care Program to help you maximise your investment in simulation.

Find out more inside.

**APEX CHANNEL PARTNER**

Bundles are configured to address specific physics discipline areas, or combinations of physics, and each also provides High Performance Computing (HPC) scalability.

## Structures and Fluids Bundle

- Ansys Additive Suite
- Ansys AUTODYN
- Ansys Blademodeler
- Ansys CFD AI+
- Ansys CFD Enterprise
- Ansys Chemkin Enterprise
- Ansys Discovery
- Ansys Forming
- Ansys Geometry Interface for Autodesk
- Ansys Geometry Interfaces for Creo Parametric, Parasolid, & Solidworks
- Ansys Granta Materials Data for Simulation
- Ansys Granta Selector
- Ansys HPC Pack
- Ansys LS-DYNA
- Ansys LS-DYNA HPC-256
- Ansys Mechanical Enterprise
- Ansys Motion
- Ansys OptiSLang AI+
- Ansys OptiSLang Enterprise
- Ansys Rocky
- Ansys Rocky HPC-8
- Ansys Sherlock
- Ansys VRXPERIENCE Sound Pro

## Embedded Software Bundle

- Ansys Medini Analyze Enterprise
- Ansys ModelCenter Premium
- Ansys SCADE Suite

## Electromagnetics Bundle

- Ansys Discovery Modeling
- Ansys Discovery Simulation
- Ansys Electronics Enterprise
- Ansys Granta Materials Data for Simulation
- Ansys HPC Pack
- Ansys MC MBSE Connectors – Genesys, Windchill & Rhapsody
- Ansys Medini Analyze Enterprise
- Ansys ModelCenter Premium
- Ansys Motor-CAD Enterprise
- Ansys OptiSLang Enterprise

## Optics and Photonics Bundle

- Ansys Discovery Modeling
- Ansys Discovery Simulation
- Ansys HPC Pack
- Ansys Lumerical Enterprise
- Ansys OPTIS HPC
- Ansys SPEOS Enterprise
- Ansys SPEOS Solver
- 8 more Ansys SPEOS Applications
- Ansys Zemax OpticStudio Enterprise

## Digital Missions Bundle

- Ansys HPC Workgroup 32
- Ansys MC MBSE Connectors – Genesys, Windchill & Rhapsody
- Ansys ModelCenter Pro & Premium
- Ansys STK Enterprise

**Within our Customer Care Program, we support our customers throughout their journey in simulation.**

Whether this is a strategic partnership with ambitious goals, or simply for continuing provision of the best customer support on a basic care level, we strive to deliver the support and assistance that startups need to get the best out of their startup bundle.

**Training  
Included**

**Best in Class  
Support**

**Utilization  
Reviews**

**Cloud  
StarterPack**

## Training

With Ansys Learning Hub you get unlimited access to classroom, virtual, and self-paced learning across the Ansys Software portfolio.

Benefit from over 300 courses, learning paths, best practice guides, demo videos, application content, and much more.

## Support

Technical support is of paramount importance for companies starting their simulation journey.

In addition to enhanced support from our dedicated technical support team, you will get a monthly support summary report of your interactions with us.

## Utilization Reviews

Understanding how to optimize simulation software use is crucial to enable your teams to work efficiently.

We will help you understand, analyse, and visualize the utilization of your simulation software, through the use of EDRMedeso's own unique solution.

## Cloud

To simplify the potential cloud based simulation hardware presents, a StarterPack is included in your care program.

Rescale computing credits and our CloudConnect application are included.

Find out more at the Care Program web page:

“ EDRMedeso has played a pivotal role in supporting our simulation and modeling efforts. Their high quality training, swift troubleshooting, and guidance have been invaluable”

- Knut Ringstad, Hystar

“ What you guys have done with your training portal is nothing short of amazing! The flexibility it provides for new engineers on boarding, and depth of advanced content is unparalleled”

- Lead Engineer, Terex

“ To generate truly innovative solutions, we required our own R&D which allows our engineers to discover and deliver the best product. The Ansys Startup Program gave us the tools to do that without which we simply wouldn't have been able to afford at this stage of the business”

- Richard McGowan, Fathom

### Full Eligibility Criteria for Start-ups:

- Be privately held
- Be less than 10 years old
- Have less than USD \$5 million in annual revenue
- Not be an engineering consulting or simulation services company
