HMT-1

HMT-1Z1

RealWear is a knowledge transfer platform company that provides in-situ information and in-the-field training to improve workforce competency, productivity and safety.

RealWear HMT-1 Designed for Safety

- The HMT-1 increases safety by improving the situational awareness of connected workers.
- It accomplishes this by providing intuitive access to information in-situ without compromising a worker's ability to perform the job at hand.
